ARRANGEMENT OF SECTIONS

PART I

PRELIMINARY

Section

1. Title.
2. Interepretation.

PART II

PUBLIC LICENCES

3. Licensing framework.
4. Unified Telecommunications Licence.
5. Telecommunication Licence for Network Facilities Services.
6. Telecommunication Licence for Network Services.
7. Telecommunication Licence for Application Services.
8. Telecommunications Licence for International Gateway Services.
9. Telecommunication Licence for Special Services.
10. Telecommunications Licence for Special Services: Rural Fixed Broadband Wireless Access Systems.
11. Telecommunication licence for fixed line telephone service.
12. Telecommunication licence for internet access provision.
13. Cellular Telecommunications licence.
14. Application for Licences under this Part.
15. Conditions attaching to public telecommunication licences.
16. Renewal of licence and notice of termination or renewal.
17. Suspension or cancellation of licences.
18. Amendment and replacement of licences.
19. Interconnection and Interoperability.
20. Network or System Modification.
21. Numbering resources.
22. Tariffs.

PART III

LIGHT LICENCE FOR BROADBAND FIXED WIRELESS ACCESS SYSTEMS

23. Private Telecommunications Network licence.

PART IV

PRIVATE NETWORK LICENCES

24. Application for a private telecommunications network licence.
25. Conditions for Licensing Private Network Operators.

PART V

VSATS

26. Considerations relating to use of Very Small Aperture Terminals (VSATs) by Public and Private Telecommunication Licensees.
27. VSATs in Mesh or Point to Point Configuration.

PART VI

PRIVATE RADIO STATIONS

28. Application for use of mobile satellite services by public and private operators.
29. Private Radio Transceiver Station or System Licences.
30. Licence application for Private Radio Transceiver Station(s) or System Licence(s).
31. Conditions for Private Radio Transceiver Station(s) or System(s) Licences.
32. Duration of licences under Part VI.
33. Requirements for Type Approval.
34. Interference.
35. Distress Calls.
36. False Signals and Impersonation.
37. Altering parameters of Radio Transceiver.
38. Radio station identification.

PART VII

AMATEUR RADIO TRANSCEIVER STATIONS

39. Amateur Radio Transceiver Operator's certificate.

Section

40. Examinations.
41. Qualifications.
42. Licence for amateur radio transceiver station.
43. Applications under Part VII.
44. Communication between amateurs.
45. Entertainment not to be transmitted.

PART VIII

RADIOCOMMUNICATION EQUIPMENT DEALERS AND REPAIRERS

46. Application for registration as dealer.
47. Application for registrations as repairer.
48. Conditions for installation and mantainence of radio communication equipment.
49. Restrictions on importation, possession or delivery of radio stations to unlicensed persons.

PART IX

SHORT RANGE AND ULTRA WIDE BAND DEVICES

50. Requirements for low power devices.

PART X

SPECTRUM ACCESS AND USAGE

51. Spectrum Licence.
52. Right to use frequencies.

PART XI

GENERAL

53. Licence fees and universal services fund contributions.
54. Preservation of secrecy.
55. Permission of owners of premises.
56. Visiting foreign stations.
57. Serial number of transmitters.

Section

58. Duplicate copies of licences or certificates.
59. Changes of address.
60. Return of licences or certificates on cancellation.
61. Indemnity.
62. Appeals.
63. Record keeping and reporting.
64. Repeals.

First Schedule: Application Forms.
Second Schedule: Licence Fees.
Third Schedule: Spectrum Access Fees.
Fourth Schedule: Frequency Usage Fees.
Fifth Schedule: Broadband Fixed Wireless Access Systems.
Sixth Schedule: Short Range and Utrawide Band Devices.

IT is hereby notified that the Minister of Information, Communication and Technology, Postal and Courier Services has, in terms of section 99 of the Postal and Telecommunications Act [*Chapter 12:05*], made the following regulations:—

PART I

Preliminary

Title

1. These regulations may be cited as the Postal and Telecommunications (Licensing, Registration and Certification) Regulations, 2021.

Interpretation

2. In these regulations—

"application service" means an end-user service provided by means of one or more services;

"Broadband Global Area Network (BGAN)" means a global satellite internet network that includes telephony;

"C band" is the portion of the electromagnetic spectrum covering the frequency range 4.0 to 8.0 GHz;

"earth station" means a station located on the earth's surface and intended for communication with one or more space stations;

"fixed satellite service" means a radiocommunication service between earth stations at given positions, when one or more satellites are used; the given position may be a specified fixed point or any fixed point within specified areas; in some cases this service includes satellite-to-satellite links, which may also be operated in the inter-satellite service; the fixed-satellite service may also include feeder links for other space radiocommunication services;

"fixed wireless access system" means a radio system employed to provide connectivity between end-user equipment and the core network;

"form" means a form prescribed in the First Schedule;

"fee" means a fee prescribed in the Second, Third and Fourth Schedules;

"hub" means a central VSAT earth station operating within a VSAT Network, star or mesh in configuration, whose functions include control of network operations, configuration, performance and traffic engineering;

"Ka band" means the portion of the electromagnetic spectrum covering the frequency range 18 to 40 GHz;

"Ku band" means the portion of the electromagnetic spectrum covering the frequency range 11.2 GHz to 14.5 GHz;

"ITU radio regulations" means the radio regulations made in terms of the ITU Constitution;

"ISM", in relation to frequency bands or radio communication systems, means Industrial, Scientific and Medical equipment;

"ITU" means the International Telecommunication Union;

"low capacity" means a rate of information transmission which is equal to or less than 2 megabits per second;

"medium capacity" means a rate of information transmission which is greater than 2 megabits per second and equal to or less than 34 megabits per second;

"Mesh topology" means a network architecture in which devices are connected with many redundant interconnections between network nodes;

"Mobile-Satellite Service (MSS)" means a radiocommunication service—

(a) between mobile earth stations and one or more space stations, or between space stations used by this service; or

(b) between mobile earth stations by means of one or more space stations;

This service may also include feeder links necessary for its operation;

"network facilities" means any element, or combination of elements of physical infrastructure, used principally for, or in connection with the provision of one or more network services, but not including customer premise equipment. (This includes a cellular telecommunication system, or a telecommunication system as defined in the Act);

"network service" means a cellular telecommunications service or a telecommunication service or both as defined in the Act, or any other service for the carrying of information in the form of speech, or other sound, data, text or images, by means of guided or unguided electromagnetic energy or both, but does not include services provided solely on the customer side of the network boundary;

"paging system" means a communication system that send brief messages to a subscriber. The message may be a tone message, a numeric message or an alphanumeric message;

"private radio station" means a radio station other than a public radio station;

"public radio station" means a radio station operated for the purpose of providing a radiocommunication service to the public;

"telecommunication gateway" means telecommunication infrastructure or hardware equipment used in

telecommunications networks that allows voice, video and data communication to flow from one discrete network to another nationally and internationally;

"trunked system" means a communication system that shares a limited number if radio channels amongst a large group of users;

"Star topology" means an architecture in which all nodes are individually connected to a central connection point, like a Hub or a router;

"Virtual Network Operator (VNO)" means a local entity that does not own VSAT network facilities but leases such facilities from International VSAT Hub service providers;

"VSAT (Very Small Aperture Terminal)" a two-way ground based station with a small aperture antenna designed to receive satellite signals;

"Unified Services Licence" means a licence issued in terms of the Act, entitling the holder to provide network facilities, network services and application services.

PART II

Public Telecommunication Licences

Licensing framework

3. (1) The Authority may in accordance with section 37 of the Act and this part issue public telecommunication licences.

(2) The Authority may, upon application and due consideration in the prescribed manner, grant a telecommunications licence with one or more of the following services—

(a) unified telecommunications services, valid for 20 years; or

(b) network facilities services (NFS), valid for 20 years; or

(c) network services (NS), valid for 20 years; or

(d) application services valid for a maximum period of 20 years; or

(e) international gateway services, valid for a maximum period of 20 years; or

(f) fixed line telephone services, valid for a period of 20 years; or

(g) internet access provision class 'A', valid for 14 years or Class 'B' valid for 12 years; or

(h) any other specified service under special circumstances, valid for a maximum period of 12 months.

(2) The Authority may, upon application and due consideration in the prescribed manner, grant a cellular telecommunications licence, valid for 20 years.

Unified Telecommunications Licence

4. (1) The Unified Telecommunication Licence shall authorise the licensee to provide telecommunication network facilities, network services and application services under one licence.

(2) The Unified Telecommunication Licence consolidates the following individual licenses—

(a) Telecommunication Licence for Network Facilities Services (NFS); and

(b) Telecommunication Licence for Network Services (NS);

(c) Telecommunication Licence for Application Services; and

(d) Telecommunications Licence for International Gateway Services.

Telecommunication Licence for Network Facilities Services

5. (1) The Telecommunication Licence for Network Facilities Services shall authorise a licence to build, own and manage passive infrastructure that facilitates provision of electronic communications and, lease or resell it, to other telecommunication operators, but specifically prohibits the licensee from providing services directly to end-users.

(2) The passive telecommunications infrastructure includes—

(a) dark optical fibre cables;

(b) copper cables;

(c) towers and associated site equipment;

(d) ducting and associated civil works.

Telecommunication Licence for Network Services

6. The Telecommunication Licence for Network Services shall authorise the licensee to operate and maintain active electronic communication equipment, such as—

(a) transmission network; and

(b) core network; and

(c) access network;

in order to offer wholesale services to other licensees through network facilities offered by a network facilities provider.

Telecommunication Licence for Application Services

7. (1) The Telecommunication Licence for Application Services shall authorise the licensee to provide end-user electronic communication services such as voice, video, data, messaging services, mobile money services, among other customer facing services.

(2) The scope of the Telecommunication Licence for Application Services may be specific to one or more service or application.

(3) The Telecommunication Licence for Application Services can be issued for the following categories—

(a) general licence for Application Services;

(b) full mobile virtual network licence;

(c) light mobile virtual network;

(d) branded reseller mobile virtual network;

(e) virtual network enablers;

(f) internet service provider (National);

(g) internet service provider (Metropolitan-Harare and Bulawayo);

(h) internet service provider (Provincial Excluding Harare and Bulawayo);
(i) internet service provider (District);
(j) internet service provider (Community);

applicants for the services referred to in paragraphs (i) and (j) shall make once off licence payments on issuance of the licence:

Provided that all licensees referred to in this section shall provide essential and emergency services such as emergency telecommunications services, operator assistance, customer assistance, crime stoppers, child helpline, health helpline, fire services, ambulance, anti-corruption; human safety and life among others, free of charge.

(4) Save for the general licence for application services, the licences listed in subsection (3) shall be valid for a maximum period of ten years.

Telecommunications Licence for International Gateway Services

8. The Telecommunications Licence International Gateway Services shall authorise the licensee to operate and maintain telecommunication facilities that allow electronic communication traffic to be interchanged between Zimbabwe and other countries. (Such facilities include international switches and or international links.)

Telecommunication Licence for Special Services

9. (1) A telecommunication licence for special services shall authorise the licensee to offer specified telecommunication services, as may be prescribed from time to, time in consultation with the Authority.

(2) Unless specified in the licence document, a telecommunication licence for special circumstances shall be a short-term licence issued under special circumstances such as testing, research, emergency and or disaster relief.

(3) The tenure of such short-term licence may not exceed a period of five years subject to renewal.

(4) Licence fees for such licences shall be prorated against full term licence fees of the licence category under which a special licence is required, unless otherwise exempted:

Provided that no licence fees shall apply for disaster management.

Telecommunications Licence for Special Services: Rural Fixed Broadband Wireless Access Systems

10. (1) Any person may apply for a telecommunications licence for special services in terms of section 9 for the establishment of fixed broadband wireless access in rural and farming areas of Zimbabwe, provided that such shall be operated within the frequency bands, bands 2400–2483 MHz and 5725–5875 MHz.

(2) Applications for a telecommunications licence for special services: rural fixed broadband wireless access systems shall be made in writing in to the Authority and applicants shall, in connection therewith, supply such information as the Authority may require.

(3) Anyone wishing to operate a rural fixed broadband wireless access system shall ensure that his or her equipment is type approved.

(4) Conditions applicable to use of rural fixed broadband wireless access systems are stipulated in the Fifth Schedule.

(5) Rural fixed broadband wireless access systems are specifically allowed in rural and underserved areas where there is low usage of the bands and low probability of causing interference to other users of the bands compared to urban areas.

Telecommunication licence for fixed line telephone service

11. The telecommunication licence for fixed line telephone services authorises the licensee to construct, develop, operate and manage a public switched electronic communication network infrastructure national long distance telecommunication service that shall include—

(a) international telecommunication services;

(b) local access telecommunication services;

(c) public fixed telephone, telegraph and telex services;

(d) public internet and data services;

(e) gateways services;

(f) the leasing of telecommunication lines:

Provided that the licensee shall provide essential and emergency services such as emergency telecommunications services, operator assistance, customer assistance, crime stoppers, child helpline, health helpline, fire services, ambulance, anti-corruption, human safety and life among others, free of charge.

Telecommunication licence for internet access provision

12. (1)The telecommunication licence for internet access provision authorises the licensee to construct, develop and maintain a telecommunications network for public data, video and internet access for the provision of data and internet access services.

(2) An application may be made for any one of the following classes of internet services, namely—

(a) class A internet access provider with authorisation to offer Internet Protocol telephony; or

(b) class B internet access provider without authorisation to offer Internet Protocol telephony:

Provided that, the licensee shall provide essential and emergency services such as emergency telecommunications services, operator assistance, customer assistance, crime stoppers, child helpline, health helpline, fire services, ambulance, anti-corruption; human safety and life among others, free of charge.

Cellular Telecommunications licence

13. (1) The Cellular Telecommunications licence authorises the licensee to construct, develop, operate and manage a national cellular telecommunication network for providing public voice, video, data and internet services.

(2) The licensed network including all telecommunication apparatus, shall conform to the technical specifications for networks and equipment, including the use of radio frequency spectrum, as set out in the Zimbabwe National Frequency Allocation Plan (ZNFAP).

(3) A national cellular telecommunication network includes the following network segments—

(a) transmission network;

(b) core network; and

(c) radio access network:

Provided that, the licensee shall provide essential and emergency services such as emergency telecommunications services, operator assistance, customer assistance, crime stoppers, child helpline, health helpline, fire services, ambulance, anti-corruption; human safety and life among others, free of charge.

Application for Licences under this Part

14. (1) Any person may, subject to the provisions of the Act and these regulations, apply for a public telecommunications licence in **Form PT1**, **Form PT2**, **Form PT3** and accompanied by the prescribed fee.

(2) The Authority may, by notice in the gazette and in at least two consecutive issues of a national newspaper give notice inviting applications for a licence and—

(a) invite interested persons to apply and submit written applications in the prescribed format within the period mentioned in the gazette or newspaper;

(b) set out the proposed licence conditions that will apply to the licence;

(c) give interested parties an opportunity to submit written representations in response to any applications submitted in terms of paragraph (a);

(d) may conduct public hearing in relation to any application for a public telecommunications licence.

(3) The Authority may, require an applicant or an interested party who has submitted a written application in terms of subsection (2(a) to furnish the Authority, within a period specified by the Authority, with such additional information as maybe reasonably necessary in order to consider the application.

(4) The Authority must, after considering—

(a) any application for a public telecommunication licence made in terms of these regulations; and

(b) any written representations made in terms of subsection (2)(c) in relation to the application;

notify the applicant of its decision, the reasons for that decision and any licence conditions applicable and publish such information in the *Gazette*.

(5) Whenever the Authority grants a public telecommunications licence, the Authority must do so on standard terms and conditions applicable to the type of licence, as prescribed in terms of section 2.

(6) Despite subsection (8), the Authority may impose on the applicant any other special conditions resulting from undertakings made by the applicant.

(7) Where an application is rejected the Authority shall inform the applicant of his or her right of appeal under section 62.

(8) Applicants and licensees shall pay the relevant prescribed fees stipulated in the Second, Third and Fourth Schedules.

Conditions attaching to public telecommunication licences

15. (1) No person shall transfer his, her or its licence to another person during the currency of the licence.

(2) A licensee shall be required to provide services within a maximum period of twelve months from the date of issuance of the licence.

(3) Where a licensee fails to provide services within the period specified in subsection (2), he or she shall be required to submit to the Authority reasons for failure to provide services and the Authority may consider extension of the period to provide services for a maximum period of twelve months.

(4) Where a licensee fails to provide services after the expiry of the extended period, the Authority shall revoke the licence.

(5) A licensee shall provide services in accordance with the applicable recommendations of the International Telecommunication

Union, other international standardisation bodies and any other relevant law applicable in Zimbabwe.

(6) A licence may authorise or require—

(a) the connection or interconnection of the telecommunication system to which the licence relates—

(i) to any other telecommunication system specified in the licence, or for a description so specified;

(ii) to any apparatus specified in the licence, or of a description so specified;

(b) the provision by means of a telecommunication system to which the licence relates of any telecommunication service specified in the licence.

(7) Without limitation to any other conditions that may be so specified or otherwise applicable, a licence may specify—

(a) guidelines, in accordance with ITU standards, to be adopted in the operation of the service;

(b) the frequencies assigned to the licensee including the applicable terms and conditions;

(c) universal service obligations to be undertaken by the licensee;

(d) performance specifications to which the licensee is to conform;

(e) the obligations of the licensee in respect of the licence conditions;

(f) the obligation of the licensee in relation to the provision of emergency service for free;

(g) any other conditions that may be specified in the licence document.

Renewal of licence and notice of termination or renewal

16. (1) Subject to section 3 every licence shall be valid for a period specified thereon.

(2) If an application for a licence is successful (whether approved with or without conditions by the Authority shall—

(a) inform the applicant accordingly in accordance with section 14(4); and

(b) issue to the applicant the relevant licence, upon payment by the applicant of the prescribed issuance fee; and

(c) make an appropriate entry in the licensing register of licences.

(3) The Authority may renew or terminate a licence issued in terms of this Part upon the written request of the licensee.

(4) Subject to subsection (5), a licensee may submit to the Authority a written request for renewal or termination of his or her licence at any time.

(5) A licensee the term of whose licence is—

(a) more than ten years, shall notify the Authority of his or her intention to renew or terminate the licence three years before his or her licence expires;

(b) more than two years and less than ten years, shall notify the Authority of his or her intention to renew or terminate the licence six months before his or her licence expires;

(c) less than two years shall notify the Authority of his or her intention to renew or to terminate the licence a month before his or her licence expires.

(6) The notice to renew or terminate a licence shall be submitted in **Form PT1**, where there has been no material change in the details of the application for the existing licence, together with the applicable fee if any, as prescribed.

(7) Upon receipt of an application for the renewal of a licence in terms of subsection (5), the same procedure as is prescribed for the issuance of an original licence shall apply.

(8) Any person who contravenes subsection (4) or (5) shall be guilty of an offence and liable to a fine not exceeding level 3 or imprisonment for a period not exceeding one month or both such fine and such imprisonment.

Suspension or cancellation of licences

17. (1) The Authority may at any time suspend or cancel any licence if the authority has reasonable grounds for believing that—

(a) the licence was issued in error or through fraud or the misrepresentation or non-disclosure of a material fact by the licensee; or

(b) the licensee has contravened any provision of the Act that is applicable to him or her; or

(c) the licensee misrepresents the service or system he or she offers to the public; or

(d) the licensee has ceased to provide the service or system specified in the licence; or

(e) the licensee has assigned, ceded or otherwise transferred the licence to another person without the prior approval of the Authority; or

(f) the licensee has failed to comply with any term or condition of the licence.

(2) Without limiting any other grounds on which the Authority may cancel a licence the following events, whether specified in the licence or not, shall constitute material breaches of the licence justifying the cancellation of the licence concerned—

(a) where applicable, failure by a licensee to commence construction of the licensed network or provision of licensed services or applications within twelve months of the date of issue of licence;

(b) failure by a licensee to provide the licensed services in accordance with the targets specified in its rollout plan;

(c) continuous service blackout of the licensed service for a consecutive period of 30 days, provided that the interruption is not a result of *force majeure*;

(d) where a licensee is declared insolvent or is liquidated under any written laws in force in Zimbabwe or any other country;

(e) failure by a licensee to pay any prescribed fees or contributions or any penalty imposed in terms of section 43 of the Act on such a licensee by the Authority.

Amendment and replacement of licences

18. (1) The Authority may at any time amend a licence or any terms or conditions of a licence—

(a) to correct any error in the licence; or

(b) if the licensee requests the amendment; or

(c) if the Authority considers the amendment necessary to reflect the true nature of the service, system or business which the licensee is conducting; or

(d) if for any other reason the Authority considers the amendment necessary or desirable in the public interest;

in accordance with the procedure provided in terms of section 42 of the Act.

(2) A licensee may submit to the Authority a written request for amendment of its licence at any time.

(3) Where the Authority proposes to amend a licence, the Authority shall notify the licensee in writing accordingly and shall in its notice specify—

(a) the proposed amendment;

(b) state the reasons for the proposed amendment;

(c) the date on which the Authority intends to effect the amendment.

(4) The licensee shall respond to a notification in terms of subsection (2) within 30 days from the date on which the Authority serves the notice on the licensee.

(5) If the licensee does not respond to the Authority within the period required under subsection (3), the authority shall amend the licence in the manner specified in the notice.

(6) Where the licensee responds within the period required under subsection (3), the authority may amend the licence taking into consideration the representations raised by the licensee.

Interconnection and Interoperability

19. (1) Any applicant for network service licence shall ensure that there is—

(a) interoperability and compatibility of the network service system with other network services systems; and

(b) availability of access to emergency services.

(2) Every licensee shall be required to comply with any regulations, technical specifications and rules that may be issued by the Authority as are applicable and appropriate in order to ensure interoperability of the licensed services and licensed systems with electronic communications services and systems provided by other operators.

(3) A licensee shall ensure that all the equipment comprised in, connected to the licensed systems and used in the provision of the licensed services is of the type, approved by the Authority.

(4) Any person who refuses, denies or inordinately delays interconnection with another operator in contravention of the Interconnection Guidelines published in Statutory Instrument 28 of 2001, shall be guilty of any offence and liable to a fine not exceeding level 14 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

Network or System Modification

20. (1) A licensee shall inform the Authority in advance of any substantive change or modification of the licensed network or system which may result in a substantial service interruption.

(2) A licensee shall ensure that any substantive change does not interfere with other existing communication networks or systems.

(3) Any person who contravenes this section shall be guilty of any offence and liable to a fine not exceeding level 10 or to imprisonment for a period not exceeding three months or to both such fine and such imprisonment.

Numbering resources

21. (1) The applicant shall apply for subscriber numbers and short codes in writing to the Authority and complete a number application

Form PT2 clearly indicating the subscriber number blocks or short codes required.

(2) The Authority shall respond within 14 days from the date of receiving the application. And if the application is successful, an invoice is issued within the 14 days.

(3) The number shall be used after payment for the numbers fees set out in Part I of the Second Schedule.

(4) Subscriber numbers are assigned in blocks of multiples of 1 000.

(5) For efficient utilisation of subscriber numbers, licensees shall be assigned additional numbers, if the utilisation of the assigned number blocks reaches 80%.

Tariffs

22. (1) Tariffs for licensed services and interconnection rates shall be approved in terms of the Act.

(2) A licensee shall display approved tariffs at each customer service centres including websites, outlets and dealers.

(3) No licensee shall—

(a) implement an unapproved tariff;

(b) publish an unapproved tariff;

(c) implement unpublished tariff;

(d) publish false or inaccurate information on licensed services.

(4) A licensee shall provide applicable roaming tariffs to outbound roaming customers.

(5) Any Licensee who implements an unapproved tariff shall be guilty of an offence and liable to a fine (from the day of commission of offence) of Fifty thousand dollars per each day in breach and continued breach by the licensee for seven days will result in cancellation of licence.

(6) Any licensee who fails to publish and display approved tariffs shall be guilty of an offence and liable to a fine of five thousand dollars per each day in breach since the last tariff adjustment.

(7) Any licensee who fails to send an SMS notifying an outbound roaming customer of the applicable roaming tariffs upon handing over the customer to a roaming partner shall be obliged to charge the equivalent of applicable home tariff for all roaming services offered during the period of visit.

PART III

Private Network Licences

Private Telecommunications Network licence

23. (1) A private telecommunications network license authorises the licensee to construct, operate and maintain a private telecommunication network for own-use.

(2) The traffic conveyed by a private network must not originate or terminate in a public telecommunications facility that is located in Zimbabwe.

Application for a private telecommunications network licence

24. (1)Any person wishing to apply for a private telecommunications network licence shall apply in writing to the Director-General indicating the licence he or she is applying for.

(2) The applicant must complete—

(a) **Form PT4** for private network application for all applications;

(b) **Form in PT5** for an Earth Station Application *(*For network with VSAT terminals*)*;

(c) **Form PT6** for a Fixed Wireless Access System;

(d) **Form PT7** for a Radio Relay;

which should be endorsed by signatures of the approved person and accompanied by the applicable prescribed fees.

(3) The Authority must, after considering any applicationinn terms of subsection (1) notify the applicant of its decision, the reasons for that decision and any conditions that are applicable to the licence.

(4) The provisions provided in sections 16 to 18 apply with the necessary changes to licences issued under this Part.

Conditions for Licensing Private Network Operators

25. (1) The Authority may license a private network operator where—

(a) the relevant telecommunication or radio communication service is not provided by a public telecommunication licensee;

(b) it is not practicable or convenient or expedient for a telecommunication licensee to provide the service in question;

(c) in the opinion of the Authority, circumstances justify the provision of the service in question;

(2) The Authority may, subject to subsection (3) licence a private telecommunication service or system and the operation of a radio station in connection therewith.

(3) Any radio station operated in connection with a private telecommunication service or system shall be worked solely for the purposes of transmitting and receiving messages relating to the business of the licensee.

PART IV

Private Network Licences

Considerations relating to use of Very Small Aperture Terminals (VSATs) by Public and Private Telecommunication Licensees

26. (1) Public Network Operators may provide VSAT services through a local or external hub, provided that VSAT services can only be provided subject to a Virtual Network Operator (VNO) contract with the VSAT upstream provider or local hub provider where the local hub is not owned by the Public Network Operator.

(2) The Public Network Operator shall submit the VNO contract to the Authority for approval before implementation.

(3) The VNO contract shall include the following minimum provisions—

(a) provision of exclusive rights to the VNO to add or delete remote stations for the Virtual Network;

(b) the VNO shall have full visibility and management rights over remote stations belonging to the Virtual Network;

(c) the VNO shall have billing and management rights for remote terminals within the virtual network;

(d) the contract shall make provision for compliance with the Interception of Communications Act [*Chapter 11:20*];

(e) all VSAT terminals shall be licensed by the Authority as specified in the Second Schedule;

(f) all local hub operators shall comply with directives issued in terms of the Interception of Communications Act;

(g) operating a VSAT Network without a VNO agreement approved by the Authority shall constitute a material breach of the licence justifying the cancellation or suspension of the licence concerned;

(h) failure by any licensee to comply with any directive issued in terms of the Interception of Communications Act shall constitute a material breach of the licence justifying the cancellation or suspension of the licence.

VSATs in Mesh or Point to Point Configuration

27. (1) No public or private network operators shall use satellite networks in mesh or star configuration, unless the network operator notifies the Authority of earth stations located in Zimbabwe which have—

(a) independent centralised control and monitoring functionality;

(b) the capability to suppress transmissions from any earth station within the network.

(2) Subject to approval by the Authority, Public and Private Network operators may use earth stations with point-to- multi point and point- to- point configurations as permanent earth stations.

(3) Any licensee who contravenes subsection (1) shall be guilty of an offence and liable to a fine of five thousand dollars per each day in breach.

Application for use of mobile satellite services by public and private operators

28. (1) Any person who wishes to use mobile satellite services from an external service provider shall apply in **Form PT8** accompanied by the prescribed fee.

(2) The Authority shall after considering the pplciation made in terms of subsection (1) notify the applicant of its decision and reasons thereof and issue the licence with or without conditions upon payment of the prescribed issuance fee.

(3) The mobile satellite service licence shall be valid for one year and the provisions of sections 16 to 18 shall apply with the necessary changes to a licence referred to in this section.

(4) Any person who uses mobile satellite services without a valid licence shall be guilty of an offence and liable to a fine of two thousand dollars per each day in breach.

PART V

Private Radio Transceiver Stations and Systems

Private Radio Transceiver Stations/System Licences

29. (1) Licences to be applied for under this Part are as follows—

(a) radio station licence for Private Mobile Radio Station (PMR);

(b) radio station licence for radio transceiver station(s) onboard an aerial vehicle;

(c) radio station licence for radio transceiver station(s) onboard a water vessel;

(d) radio station licence for ameauture radio transceiver station(s);

(e) radio station licence for citizen band radio transceiver station(s);

(f) radio station licence for meteorological aids.

Licence application for Private Radio Transceiver Station(s)/ System(s)

30. (1) Applications for licences under this Part shall be made in writing in form PT9 to the Authority and applicants shall, in connection therewith, supply such information as the Authority may require.

(2) The Authority shall, within 10 working days of receiving the application, give a response to the applicant, whether to request for additional information or to indicate that the application has been successful.

(3) The proposed radio communication system may not be brought into service, nor may any alteration be made to an existing licensed network without written authority from the Authority.

(4) The applicant or licensee shall pay the relevant licence fees set out in Part II of the Secod Schedule.

(5) Where applicable, licensees shall pay spectrum usage fees as set out in the Fourth Schedule.

Conditions for Private Radio Transceiver Station(s)/System(s) Licences

31. (1) Subject to the Act, the licences set out in the first column of Part II of the Second Schedule shall be issued subject to the conditions set out therein and payment of the relevant licence fees:

Provided that, in such circumstances as it may determine the Authority may waive the payment or remit any fee or charge payable in terms of this Part.

(2) Detailed conditions attaching to amateur radio transceiver stations are set out in Part VII.

(3) The issue of a licence for radio transceiver station(s) onboard an aerial vehicle shall not in any way exempt the licensee from compliance with the provisions of the Civil Aviation Act [*Chapter 13:16*], nor shall such issue be construed as a guarantee by the Authority that the licence for radio transceiver station(s) onboard an aerial vehicle and radio apparatus associated therewith are safe for all the conditions which may be encountered during the operation of the aircraft in which the station is installed.

(4) The issue of a licence for radio transceiver station(s) onboard a water vessel shall not in any way exempt the licensee from compliance with the provisions of the Inland Waters Shipping Act [*Chapter 13:06*], nor shall such issue be construed as a guarantee by the Authority that the radio transceiver station(s) onboard a water vesse and radio apparatus associated therewith are safe for all the conditions which may be encountered during the operation of the ship in which the station is installed.

(5) Any person who operates without a valid a private radio transceiver station or system commits an offence and shall be liable to a fine of five thousand dollars or three months imprisonment.

(6) Any licensee who fails to renew a licence within three months from date of expiry shall be guilty of an offence and liable to a fine of two thousand dollars.

Duration of licences under Part V

32. (1) Licences for private radio transceiver station(s)/ System(s) issued in terms of this Part shall be valid for the period shown in the licence document.

(2) Applications for renewal must be made at least 15 days before the date of expiry of the licence subject to payment of the prescribed renewal fees.

Requirement for type approval

33. (1) All equipment used in relation to a licence issued under this Part shall be type approved by the Authority, prior to bringing the equipment into operation.

(2) The applicant shall submit an application with the necessary documentation as may be required by the Authority together with the prescribed fee set out in the Second Schedule.

(3) The Authority shall check the equipment for conformance wth technical parameters adopted for use in Zimbabwe.

(4) If the equipment is found to be in comformity, the Authority shall issue a certificate of approval for such equipment.

(5) The Authority shall maintain a register of type-approved radiocommunication equipment, which shall be made available on request and on the Authority's website.

(6) No licensee shall supply or install equipment, which is not type approved.

(7) Any person who contravenes this section shall be guilty of an offence and liable to a fine of not exceeding level 9 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

PART VI

General Provisions Applicable to Licensees

Interference

34. (1) A licensee shall establish and work his or her radiocommunication system in such a manner as not to cause harmful interference to other radiocommunication systems licensed or worked by another licensee.

(2) Radiocommunication systems operating within frequency bands designated as ISM bands shall accept interference from ISM devices and systems.

(3) Radiocommunication systems operating in bands designated as ISM bands shall not cause harmful interference to systems operating in the adjacent bands.

(4) Any person who contravenes this section shall be guilty of an offence and liable to a fine not exceeding level 12 or to imprisonment for a period not six months or to both such fine and such imprisonment.

Distress calls

35. A licensee shall accept with absolute priority any distress call, message or signal regardless of its origin and shall immediately take such action in accordance with the guidelines provided for in the licence or by otherwise provided for by the Authority.

False signals and impersonation

36. (1) No licensee or person working a radio communication service shall transmit or use call signs or other identifying signals which have not been assigned to that radio station by the Authority.

(2) No person or licensee in the working of any radio communication service shall impersonate any other licensee.

(3) Any person who contravenes this section shall be guilty of an offence and liable to a fine not exceeding level 10 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment

Altering parameters of radio transceiver station(s)

37. (1) No radio transceiver station shall be altered in respect of—

(a) its power beyond the set limit stipulated in the licence; or

(b) the class or characteristics of its emission stated in the licence; or

(c) in the case of a fixed station, its location or area stated in the licence; or

(d) in the case of a mobile station, its area of operation stated in the licence;

without prior written approval of the Authority.

(2) Any person who contravenes this section shall be guilty of an offence and liable to a fine not exceeding level 9 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment

Radio station identification

38. (1) No radio station shall transmit signals without identification of such station.

(2) Any person who contravenes this section shall be guilty of an offence and liable to a fine not exceeding level 6 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

PART VII

Amateur Radio Transceiver Stations

Amateur Radio Transceiver Operator's certificate

39. (1) Any person, above the age of sixteen, who wishes to apply for a Radio Amateur Operator's Certificate may do so by submitting information as may be required by the Authority including—

(a) the name and address of the applicant;

(b) proof of his or her citizenship;

(c) copy of identity document;

(d) the type of certificate which is applied for.

(2) Each application shall be accompanied by two unmounted photographs of recent date and approximately seventy-five millimetres by fifty millimetres in dimension showing the head and shoulders of the applicant.

Examinations

40. (1) The holding of examinations for the certificate set out in section 34, shall be advertised by the Authority and shall be held at such intervals, at such times, in such places and under such conditions as the Authority may specify.

(2)Where an applicant for a certificate produces to the satisfaction of the Authority evidence of qualifications recognised outside Zimbabwe, it may issue to the applicant a certificate set out in section 33.

Qualifications

41. (1) An Amateur Transceiver Radio Operator's Certificate shall be issued only to a person who—

(a) holds a Radio Amateur Examination Certificate issued to him or her by the Authority; or

(b) satisfies the Authority that he or she possess qualifications or knowledge and experience equivalent to that required for the possession of such certificate; and

(c) proves, to the satisfaction of the Authority—

(i) that he or she has sufficient knowledge of the technique of living up and working a radio transmitter, with special reference to the maintenance of correct frequency and avoidance of harmful interference; and

(ii) that he or she has sufficient knowledge of the working procedures to enable him or her to comply

with the provisions of these regulations and the ITU Radio Regulations.

Licence for amateur radio transceiver station

42. A licence to establish and work an amateur station shall be issued only—

(a) to a person who possesses an Amateur Transceiver Radio Operators Certificate; and

(b) subject to inspection of the station by the Authority before it is brought into use.

Applications under Part VII

43. (1) Applications for licences for amateur radio transceiver stations shall be made in writing to the Authority and applicants shall, in connection therewith, supply such information as the Authority may require.

(2)A licence for a radio amateur station shall not be issued to an association, company, corporation, educational institution or any other body of persons corporate or unincorporated:

Provided that in the case of a *bona fide* radio society such a licence may be issued to an office-bearer of such society who holds on behalf of such society a licence to work a radio amateur station.

Communication between amateurs

44. (1) A radio amateur station may establish communication only with another amateur radio transceiver station.

(2) Communication with another amateur radio transceiver station outside Zimbabwe shall be established only if such communication is not prohibited by or under the law in force in the country in which such other radio amateur station is situated.

(3) Subject to the provisions of this section when communications between radio amateur stations are permitted they shall be limited to messages relating to radio experiments and to remarks of a personal character for which by reason of their unimportance recourse to use public telecommunication service is not justified.

(4) All communications between radio amateur stations shall be conducted in plain language or the "Q" code and neither the licensee

of the amateur station or any other person shall use his or her radio station or allow it to be used for the transmission of advertisements, news, or any message for or on behalf of a third party.

(5) Any headquarters of an amateur radio society recognised by the Authority may, with its approval, transmit information bulletins of direct interest to amateurs at regular intervals and may transmit Morse code transmission for persons learning or improving their efficiency in Morse code.

Entertainment not to be transmitted

45. (1) An operator of an amateur radio transceiver station(s) shall not transmit from his or her station any form of entertainment unless it is for testing purposes subject to the following conditions—

(a) no transmission of music shall exceed a period of three minutes in any such transmission; and

(b) after a transmission of music there shall be a period of at least five minutes during which music is not transmitted; and

(c) where gramophone records are used no mention shall be made of the make or name thereof or of any information to identify the records; and

(d) transmission of music shall be restricted to the following frequencies—

(i) 3 650 Kilohertz to 3 800 Kilohertz; and

(ii) 144 Megahertz to 146 Megahertz; and

(iii) 430 Megahertz to 440 Megahertz; and

(iv) 1 215 Megahertz to 1 300 Megahertz; and

(v) 2 300 Megahertz to 2 450 Megahertz; and

(vi) 5 650 Megahertz to 5 850 Megahertz; and

(vii) 10 000 Megahertz to 10 500 Megahertz.

(2) For the purposes of this section the transmission of anything recorded whether on a gramophone record or by any means shall be deemed to be a transmission of music.

(3) Any person who contravenes this section shall be guilty of an offence and liable to a fine not exceeding level 9 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

PART VIII

Radiocommunication Equipment Dealers and Repairers

Application for registration as dealer

46. (1) Any person who is an importer or distributor of electronic communications equipment, shall be registered as a telecommunications equipment dealer by the Authority.

(2) No person shall be registered as a telecommunications dealer in radiocommunications equipment unless he or she has satisfied the Authority that he or she has the technical capacity to examine, test and certify that any radio transmitting station assembled, manufactured or sold by him or her conforms to the technical specifications laid down by the Authority for that type of station.

(3) Any person who is an importer or distributor of electronic communications equipment shall ensure that equipment imported or distributed to sellers are of acceptable quality and of the type approved by the Authority.

(4) The importer, distributor or seller of electronic communications equipment which use frequency spectrum shall ensure that customers have frequency licences from the Authority.

(5) No person shall carry on the business of dealership in telecommunication or radiocommunication equipment unless they have been issued with a certificate by the Authority.

(6) A dealership certificate of registration shall at all times be kept by the dealer on the premises to which it relates, and an additional copy of such certificate may be issued by the Authority for each set of premises in which the dealer carries on business as a dealer, subject to payment of a prescribed fee for the issuance of additional certificates.

(7) Every application for registration shall include—

(a) the name of the person or firm concerned; and

(b) the address or addresses at which the trade, business or industry is carried on; and

(c) information indicating whether such trade, business or industry is conducted as an assembler, manufacturer, importer, wholesaler, retailer, auctioneer or any or all of those in combination; and

(d) complete particulars of his or her training, qualifications and experience; and

(e) any other information as the Authority may reasonably require.

(8) The duration of a certificate issued in terms of this section shall be specified in the certificate.

(9) Every dealer shall submit to the Authority such returns and information at such times as the Authority may reasonably request.

(10) Any person who contravenes this section shall be guilty of an offence and liable to a fine not exceeding level 9 or to imprisonment for a period exceeding six months or to both such fine and such imprisonment.

Application for registrations as repairer

47. (1) No person shall operate any business of repairing radiocommunication or telecommunication equipment without registering with the Authority.

(2) Every application for registration as a repairer shall include—

(a) the full names of the repairers; and

(b) national identity numbers; and

(c) postal and physical address; and

(d) complete particulars of his or her training, qualifications and experience; and

(e) any other information as the Authority may reasonably require.

(3)The duration of a certificate issued in terms of this section shall be specified in the certificate.

(4) No person shall carry on the business of a telecommunication or radiocommunication station or equipment repairer unless they have been issued with a certificate by the Authority

(5) Any person who carries on the business of repairing radio communication equipment without a licence shall be guilty of an offence and liable to a fine not exceeding level 9 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

Conditions for installation and maintenance of radio communication equipment

48. (1) Any person who carries on the business of maintenance or installation of radiocommunication equipment shall be registered with the Authority as a radiocommunication equipment repairer.

(2) Any radio repairer shall record in a register kept for that purpose the following particulars in respect of every service provided by him or her—

(a) the name and address of the person on whose behalf the repair is carried out; and

(b) the make, type and serial number of the transmitter required or of the transmitter with which any repaired equipment is associated; and

(c) the nature or the repair carried out; and

(d) particulars of the licence, of the person on whose behalf the repair is carried out.

(3) Any person who carries on the business of maintenance or installation of radio stations shall submit to the Authority such returns and information at such times as the Authority may reasonably request.

(4) Any person who contravenes this section shall be guilty of an offence and liable to a fine of level 6 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

Restrictions on importation, possession or delivery of radio stations to unlicensed persons

49. (1) No dealer or his or her employee or agent shall deliver a radio station to any person in pursuance of the sale, exchange, hire or loan of that station, or for any other reason, unless that person first produces, or causes to be produced, to him or her a licence authorising the possession of the radio station by that person, irrespective of whether or not that radio station is to be used for the purpose of establishing a new station or to add to an existing licensed network.

(2) No person shall import, possess or deliver any radio station without a licence or express permission from the Authority.

(3) Any person who contravenes this section shall be guilty of an offence and liable to a fine not exceeding level 10 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

PART IX

Short Range and Ultra Wide Band Devices

Requirements for low power devices

50. (1) Short range and ultra wide band devices operating or conforming to parameters stipulated in the Sixth Schedule shall be exempt from licensing.

(2) Such devices shall operate on a no-protection and non-interference basis.

(3) Such devices shall be subject to type approval.

PART X

Spectrum Access and Usage

Spectrum licence

51. (1) Applications for radio frequency spectrum for use in the deployment of public land mobile systems shall be made in writing to the Authority. Applicants shall, in connection therewith, supply such information as the Authority may require.

(2) Applications for radio frequency spectrum for radio relay or fixed wireless access systems shall be made in writing to the Authority in **Form PT6** or **Form PT7** together with such information as the Authority may require.

(3) An application for spectrum assignment shall be made by a person who holds a valid telecommunications licence.

(4) No licensee shall apply for frequencies for speculative or hoarding purposes.

(5) A licensee shall pay spectrum access fees as prescribed in the Third Schedule and spectrum usages fees as prescribed in the Fourth Schedule.

(6) The Athourity shall revoke spectrum assignments in cases where assigned frequencies remains unused for a period of six months.

Right to use frequencies

52. (1) No person shall use radio spectrum without the appropriate authorisation.

(2) Unless stated in the licence document no spectrum assignment shall be construed as conferring any exclusive right in respect of any frequencies.

(3) The Authority may re-assign any frequency or frequencies assigned to any licence in certain circumstances and conditions to which the Authority will give prior notification to the licensee as the case may determine.

(4) Any person other than a licensee who uses unassigned radio frequencies shall be guilty of an offence and liable to a fine not exceeding level 12 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment

(5) Any licensee who contravenes subsection (1) shall be guilty of an offence and liable to a fine of five thousand dollars per each day in breach.

PART XI

General

Licence fees and universal services fund contributions

53. (1) An applicant for a licence or a licensee shall pay to the

Authority the following fees and contributions as prescribed by notice in the *Gazette* or as set out in the Second Schedule—

(a) a non-refundable application fee; and

(b) an initial or renewal licence fee; and

(c) and where applicable—

(i) an annual licence fee;

(ii) and a contribution to the Universal Services Fund in terms of section 76 of the Act.

(2) Where applicable, a licensee shall pay to the Authority—

(i) spectrum access fees as set out in the Third Schedule;

(ii) and annual spectrum usage as set out in the Fourth Schedule.

Preservation of secrecy

54. (1) It shall be a condition of the issue of a licence or certificate that if any message, the receipt of which is not authorised thereunder, is received by means of the station concerned neither the licensee not the holder of the certificate shall make known the contents of any such message, its origin or destination, its existence or the fact of its receipt to any person except an officer of the Authority or a competent legal tribunal and shall not retain any copy or make any use of any such message or access it to be reproduced in writing, copied or made use of.

(2) A licence or certificate shall not be issued unless the applicant signs, in the presence of an officer of the Authority, a declaration of secrecy in the following form—

"I (name in full) do solemnly declare that if any radio communication which I am not entitled to receive is unintentionally received through my working of a radio station I will not make known or allow to be made known its contents, its origin, its destination, its existence or the fact of its receipt to any person otherwise than in terms of subsection (1) of section 54 of these regulations.".

Permission of owners of premises

55. Where an applicant for a licence to work a radio station is not the owner of the premises on which the station is to be installed

no licence shall be issued unless the applicant has produced to the Authority the written permission of the owner of the premises for such an installation.

Visiting foreign stations

56. (1) The provisions of these regulations shall not apply to visiting foreign aircraft or ship stations except in so far as compliance with the ITU Convention is concerned.

(2) Other visiting foreign stations other than those mentioned in subsection (1) may require temporary licence before entry into Zimbabwe.

Serial number of transmitters

57. (1) No radio station shall be sold, given, lent or otherwise transferred to any person unless a serial number is firmly affixed or endorsed in a prominent place on the chassis of the transmitter.

(2) Any person who contravenes this section shall be guilty of an offence and liable to a fine not exceeding level 10 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

Duplicate copies of licences or certificates

58. A duplicate copy of any licence or certificate issued in terms of these regulations may be provided by the authority upon payment of the appropriate fee set out in the Second Schedule.

Changes of address

59. The holder of any licence or certificate issued in terms of these regulations shall, within 14 days of any change in any address specified in such licence or certificate, notify the authority of the person's new address.

Return of licences or certificates on cancellation

60. Where in terms of the Act, the Authority refuses to renew, cancels or suspends any certificate or licence the holder of the certificate or licence in question shall return it to the Authority at its request.

Indemnity

61. No liability shall attach to the Authority or to any employee of the Authority for any loss or damage sustained by any person as a

result of the *bona fide* exercise or performance of any function which by or in terms of the Act is conferred or imposed upon the Authority:

Provided that this section shall not be construed so as to prevent any person from recovering compensation for any loss or damage sustained by him or her which was caused by gross negligence or recklessness.

Appeals

62. (1) Any person who is aggrieved by a decision of the Authority to—

(a) reject an application for a licence; or

(b) grant an application for a licence subject to conditions; or

(c) cancel a licence; or

(d) suspend a licence; or

(e) amend a licence;

may appeal in writing to the Minister in accordance with the provisions of section 96 of the Act.

Record keeping and reporting

63. (1) A licensee shall—

(a) keep proper records of network plans and installations;

(b) submit reports and returns as prescribed or requested by the Authority;

(c) inform the Authority of any material changes in network.

(2) No licensee shall make false declarations of information in reports, returns and accounts submitted to the Authority.

(3) Any licensee who contravenes this section shall be guilty of an offence and liable to a fine of five thousand dollars for each contravention.

Repeals

64. The Postal and Telecommunications (Licensing, Registration and Certification) Regulations, 2001, published in Statutory Instrument 11A of 2001, are repealed.

FIRST SCHEDULE (*Section 14*)

(Licence Application Forms: PT1, PT2, PT3, PT4 and PT5)

FORM PT1 **section 14**

Postal and Telecommunications Regulatory Authority of Zimbabwe

APPLICATION FOR LICENCES OTHER THAN PRIVATE RADIO STATION LICENCES

Instructions on how to complete this form

- Attach annexures wherever necessary.
- Do not leave any questions blank or unanswered; where necessary answer "not applicable" or "not known".
- All responses in this form and all annexures shall be typewritten.
- Upon completion the original of this form and supporting annexures shall be submitted to:—

  The Director-General,
  1008, Performance Close,
  Mt. Pleasant Business Park,
  P.O. Box MP 843,
  Mount Pleasant.
  Harare.

All inquiries concerning this form should be directed to the Director-General at the above address.

PRELIMINARY

State the name, address and telephone number of the person(s) who may be contacted regarding any question in respect of this application:

.....

.....

SECTION 1

PARTICULARS OF APPLICANT

1. Name of applicant (*attach certificate of incorporation*):

   .....

   .....

2. Type of licence(s) applied for new/renewal/upgrade/conversion:

   .....

   .....

3. Address of applicant's head office:

   .....

   .....

4. Names, addresses and occupations of directors:

   .....

   .....

5. Indicate shareholding structure (including nationalities of shareholders):

.....

.....

6. Names, address, nationality, qualifications and experience of chief executive officer:

.....

.....

7. Names, addresses, nationalities and qualifications of senior managers who would be involved in the project if application is successful:

.....

.....

8. Names, addresses and qualifications of auditors and lawyers in Zimbabwe:

.....

.....

9. Indicate applicant's shareholding (if any) of 10% or more in another telecommunications licensee:

.....

.....

10. Provide your project proposal, typed or printed, written in English, bound and in 10 copies. The proposal must include, without limitation the following:

(a) the technical specifications, including—

(i) description of system and technology;

(ii) detailed frequency requirements (if any);

(iii) detailed roll out plan which includes, without limitations, time scales, provision of emergency services and community services proposals;

(iv) inter-operability;

(b) the business plan, including—

(i) market analysis and projections;

(ii) particular of financial resources to be applied to project;

(iii) tariff proposals, covering connection charges, monthly subscriptions call charges and other charges;

(iv) cash flow projections for three years;

(v) experience in the provision of similar services.

11. Has the applicant or any of its associate ever been censured, disciplines, penalised, suspended, prosecuted, convicted, warned as to conduct, investigated or subjected to proceedings by or at the instance of any governmental agency, regulatory authority or professional association within or outside Zimbabwe, whether in connection with its banking activities or otherwise?

YES/NO. If yes provide details.

12. Has the applicant or any of its associates ever been or is now the subject of any litigation, in Zimbabwe or elsewhere, which may have a material effect on its resources?

13. Has the applicant or any of its associates failed to satisfy within one year any judgment debt issued in Zimbabwe or elsewhere? YES/NO. If yes provide details.

14. Has the applicant or any of its associates—

(a) ever been adjudged insolvent by a court, in Zimbabwe or elsewhere? (YES/NO);

(b) been served with an insolvency petition or petition for its compulsory winding-up within the last 10 years in Zimbabwe or elsewhere? (YES/NO);

(c) made any compromise with its creditors? (YES/NO);

(d) had any liquidator, receiver of property or judicial manager (final or provisional) appointed in relation to its property? (YES/NO);

(e) instituted proceedings for its voluntary winding up within the last 10 years in Zimbabwe or elsewhere? (YES/NO).

If the answer to any of the questions is yes, provide details.

Declaration

We, the undersigned chief executive officer ad members of the Board of Directors of the applicant, do hereby declare that—

(a) all information given in response to and in support of the questions of this application is true and correct to the best of our knowledge and belief;

(b) this application is made in good faith with the purpose and intent that the affairs and business of the applicant will at all times be honestly conducted in accordance with good and sound business principles and in full compliance with all applicable laws and lawful directives from the Authority.

We further declare that to the best of our knowledge and belief there are no other facts or information relevant to this application of which the Authority should be aware, and we pledge to promptly inform the Authority of any changes material to this application which may arise while it is being considered by the Authority. We hereby authorise the Authority and any of its authorised staff to make an inquiry or obtain any information from any source for the purpose of determining the correctness of all representations made in connection with this application or of assessing its merits.

Form PT4 section 24

Postal and Telecommunications Regulatory Authority of Zimbabwe

APPLICATION FOR A PRIVATE NETWORK LICENCE

Application No

License No

1. Name of applicant: (include company Certificate of Incorporation):

.....

.....

2. Address and telephone number of applicant:

(a) Postal address: ……
……

(b) Physical address: ……
……

(c) Telephone: ……
……

(d) Fax: ……
……

(e) E-mail: ……
……

3. Private telecommunication service applied for: [Tick applicable]

(a)	Local	
(b)	National	

4. Company profile (list shareholders, shareholding and directors, including nationalities and addresses):

Shareholder	Nationality/Address	Shareholding
.....	.....	.....
.....	.....	.....
.....	.....	.....
.....	.....	.....

Director	Nationality/Address
.....	.....
.....	.....

5. Shareholding (state level of foreign ownership in the company):

.....
.....
.....

6. Name, address, nationality, qualifications and experience of chief executive officer:

.....
.....
.....

7. Names, addresses, nationalities and qualifications of senior managers who would be involved in the project if application is successful:

.....
.....

8. Names, addresses and qualifications of auditors and lawyers in Zimbabwe (where applicable):

.....

.....

9. Provide your project proposal, typed or printed, written in English, bound and in ten copies. The proposal must include, without limitation the following:

(a) description of the service—

(i) a description of the nature and purpose of the service to be provided by the proposed private network;

(ii) the area of operation of the proposed private network;

(iii) full details of the premises where the elements of the proposed private network will be installed;

(b) technical information—a detailed description of all technical aspects of the proposed private telecommunication network including but not limited to:

(i) configuration of the proposed private telecommunications network;

(ii) equipment to be used by the applicant, not supplied by the public switched telecommunication network (PSTN) operator;

(iii) need to fill appropriate forms for spectrum usage if required.

10. Has the applicant or any of its associate ever been censured, disciplined, penalised, suspended, prosecuted, convicted, warned as to conduct, investigated or subjected to proceedings by or at the instance of any governmental agency, regulatory authority or professional association within or outside Zimbabwe, whether in connection with its banking activities or otherwise? YES/NO. If yes, provide details.

11. Has the applicant or any of its associates ever been or is now the subject of any litigation, in Zimbabwe or elsewhere, which may have a material effect on its resources?

12. Has the applicant or any of its associates failed to satisfy within one year any judgment debt issued in Zimbabwe or elsewhere? YES/ NO. If yes, provide details.

13. Has the applicant or any of its associates ever: been adjudged insolvent by a court, in Zimbabwe or elsewhere? (YES/NO); been served with an insolvency petition or petition for its compulsory winding-up within the last ten years in Zimbabwe or elsewhere? (YES/NO); made any compromise with its creditors? (YES/NO); had any liquidator, receiver of property or judicial

manager (final or provisional) appointed in relation to its property? (YES/NO); instituted proceedings for its voluntary winding up within the last ten years in Zimbabwe or elsewhere? (YES/NO). If the answer to any of the questions is yes, provide details.

14. Declaration:

We, the undersigned chief executive officer and members of the Board of Directors of the applicant, do hereby certify that –

(a) all information given in response to and in support of the questions of this application is true and correct to the best of our knowledge and belief;

(b) this application is made in good faith with the purpose and intent that the affairs and business of the applicant will at all times be honestly conducted in accordance with good and sound business principles and in full compliance with all applicable laws and lawful directives from the Authority.

We further certify that to the best of our knowledge and belief there are no other facts or information relevant to this application of which the Authority should be aware, and we pledge to promptly inform the Authority of any changes material to this application which may arise while it is being considered by the Authority. We hereby authorise the Authority and any of its authorised staff to make an inquiry or obtain any information from any source for the purpose of determining the correctness of all representations made in connection with this application or of assessing its merits.

□ New Service

□ Renewal

□ License Modification

Date

Application No.

License No.

Please read the following conditions carefully before completing the application form.

A1. An application form must be completed in duplicate and all appropriate fields answered in full.

The answers given form the basis on which a licence is issued and the conditions of that licence.

A2. Use block letters, where not applicable, insert N/A. If any detail of your proposed system is not covered by this form, please attach a separate letter detailing your requirements.

A3. The proposed radio communication service may not be bought into service, nor may alteration be made to an existing licensed network without written authority from POTRAZ.

A4. Assistance should be sought from authorised radio Dealer in completing the field on the technical aspects of the radio system.

A5. The following documents are required on presentations of the application forms:—

(a) Companies:

(i) Certified copies of Certificate of Incorporation and CR 14 list of Directors

(ii) Proof of residence of one of the directors

(iii) Certified copies of National Identity

(b) Individual:

(i) Certified copy of National Identity

(ii) Proof of residence

(c) NGO and Diplomatic Mission (I) Memorandum of Agreement with the Government of Zimbabwe.

(d) Residents Association Treasurer:

(i) proof of residence of Chairman, Secretary and

(ii) certified copies of National Identity of Chairman, Secretary and Treasurer.

(iii) Memorandum of Agreement with Zimbabwe Republic Police (local office).

(e) Farmers Association:

(i) Proof of residence of Chairman, Secretary and Treasurer.

(ii) Memorandum of Agreement with Zimbabwe Republic Police (local office).

(f) Government Departments Institution:

(i) Current Zimbabwe Act which establishes the Government.

(ii) Certified copy of National Identity of Chairman/Director/C

(iii) Proof of residence of Chairman/Director/CEO.

SECOND SCHEDULE (*Sections 21, 26, 31, 33 And 57*)

LICENCE FEES

Fees for licences other than Private Radio Station Licences

1. Notwithstanding anything contained in any law, initial, renewal, number and spectrum fees contained in this schedule shall be payable as follows:

(1) By foreign Registered companies, foreign entities and foreign individuals, in United states Dollars.

(2) Partly in United States Dollars and partly in Zimbabwe dollars, by Companies incorporated in Zimbabwe and Zimbabwean entities, part of whose shares are owned by foreigners, with the percentage amount payable in United Dollars being equivalent in percentage terms to the percentage of foreign shareholding and the percentage amount payable in Zimbabwe Dollars ,being equivalent to the percentage of Zimbabwean shareholding.

(3) By companies incorporated in Zimbabwe and Zimbabwean entities which are wholly owned by Zimbabwean citizens or persons who are permanent Residents of Zimbabwe, in Zimbabwe dollars.

(4) By Individual Zimbabwean Citizens and permanent Residents of Zimbabwe, in Zimbabwe dollars.

Provided that, subject to the Exchange Control Regulations in force in Zimbabwe at any given time, nothing contained in this schedule, shall prevent any company incorporated in Zimbabwe, any Zimbabwean entity, any individual Zimbabwean citizen or permanent Resident of Zimbabwe, from paying the equivalent of any of the fees contained in this Schedule, in United States Dollars, or any other major foreign currency acceptable to the Authority.

(5) Subject to subsection (6) and notwithstanding anything contained in these Regulations, the prescribed percentage of Universal Service fees and the relevant percentage fee of annual gross turnover for revenue generated, shall be payable in the currency in which the revenue was received by the operator.

1. Fees for Public Licences other than Private Radio Station Licence

Initial/renewal fee payable on or before issue of licence or on such later date stipulated by the Authority.

Licence Name	***Application Fees***	***Initial /Renewal Licence Fees***	***Annual licence fees for Public Operators***	***Contribution to USF by all public licensees***
Unified Telecommunications Licence	*US$800*	*US$2,100,000,00*	*An annual fee of 2% of gross turnover plus VAT, payable monthly in arrears, by the end of the following month, for 12 months or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*
Telecommunication Licence for Network Facilities Services	*US$800,00*	*US$525,000,00*	*An annual fee of 2% of gross turnover plus VAT, payable monthly in arrears, by the end of the following month, for 12 months or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*

Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*

The Public fixed telecommunications Network Licence	*US$800.00*	*US$100,000,000,00*	*An annual fee of 2% of gross turnover plus VAT, payable monthly in arrears, by the end of the following month, for 12 months or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*
The Public mobile cellular licence fees	*US$800,00*	*US$137,500,000,00*	*An annual fee of 2% of gross turnover plus VAT, payable monthly in arrears, by the end of the following month, for 12 months or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*

Internet Access Provider Class A licence	*US$350,00*	*US$5,500,000,00*	*An annual fee of US$100, 000, 00 or 2 % of the annual gross turnover whichever is greater, payable monthly in arrears, at the end of the following month, for 12 months or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made payable within 90 days of financial year end to be authenticated by an audit certificate.*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*
Internet Access Provider Class B licence	*US$350,00*	*US$2,750,000,00*	*An annual fee of US $60 000, 00 or 2% of the annual gross turnover whichever is greater payable monthly in arrears, at the end of the following month, for 12 months or part thereof. Final payment, being balance of 2% of annual gross turnover or US$60 000 less monthly payments already made payable within 90 days of financial year end to be authenticated by an audit certificate.*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*

Public Data Network licence	*US$350,00*	*US$2,750,000,00*	*An annual fee of US $60 000, 00 or 2% of the annual gross turnover whichever is greater payable monthly in arrears, at the end of the following month, for 12 months or part thereof. Final payment, being balance of 2% of annual gross turnover or US$60 000 less monthly payments already made payable within 90 days of financial year end to be authenticated by an audit certificate.*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*
Mobile Virtual Network Enablers Licence	*US$50,00*	*US$500,00*	*An annual fee of 2% of gross turnover, payable monthly in arrears, by the end of the following month, for 12 months, or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end, to be authenticated by audit certificate*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*

Full Mobile Virtual Network Operator Licence	*US$50,00*	*US$50,000,00*	*An annual fee of 2% of gross turnover, payable monthly in arrears, by the end of the following month, for 12 months, or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end, to be authenticated by audit certificate*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*
Light Mobile Virtual Network Operator Licence	*US$50,00*	*US$5,000,00*	*An annual fee of 2% of gross turnover, payable monthly in arrears, by the end of the following month, for 12 months, or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end, to be authenticated by audit certificate*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*

Branded Reseller Mobile Virtual Network Operators Licence	*US$50.,00*	*US$500,00*	*An annual fee of 2% of gross turnover, payable monthly in arrears, by the end of the following month, for 12 months, or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end, to be authenticated by audit certificate*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*
Internet Service Provider Licence (National)	*US$50,00*	*US$50,000,00*	*An annual fee of 2% of gross turnover, payable monthly in arrears, by the end of the following month, for 12 months, or part thereof. Final payment, being balance of 2% of annual gross turnover less monthly payments already made, payable within 90 days of financial year end, to be authenticated by audit certificate*	*a contribution of 1.5% of monthly gross turnover plus VAT, as a direct contribution to the Universal Services Fund, payable monthly in arrears by the end of the following month, for 12 months or part thereof. Final payment, being balance of 1.5% of annual gross turnover, less monthly payments already made, payable within 90 days of financial year end to be authenticated by an audit certificate.*
Internet Service Provider (Provincial - excluding Harare and Bulawayo	*US$50.00*	*US$$2,500,00*	*Exempted from annual licence fees contributions*	*Exempted from USF annual contributions*
Internet Access Provider (Metropolitan)	*US$50.00*	*US$5,000,00*	*Exempted from annual licence fees contributions*	*Exempted from USF annual contributions*

Internet Access Provider (District)	*US$50,00*	*US$1,000,00*	*Exempted from annual licence fees contributions*	*Exempted from USF annual contributions*
Internet Access Provider (Community) Registration	*US$50,00*	*US$50,00*	*Exempted from annual licence fees contributions*	*Exempted from USF annual contributions*
Value Added Services	*US$50,00*	*US$50,00*	*Exempted from annual licence fees contributions*	*Exempted from USF annual contributions*
DNS Registrar Licence	*US$50,00*	*US$2,500,00*	*Exempted from annual licence fees contributions*	*Exempted from USF annual contributions*

2. Private Network Licence fees

(i) An application fee (Non-refundable . . US$160,00
(ii) An Initial fee payable in advance before issuance of the licence . . . . US$2500,00
(iii) An annual fee payable in advance on or before the anniversary date of the licence . . . US$2500,00
(v) An annual contribution as direct contribution to the universal services fund, payable in advance on or before the anniversary date of the licence . US$1000,00

3. The VSAT/Mobile Satellite Service Terminal (MSS) landing rights fees (Payable in **US dollars**)

#	**Satellite Service**	**Fees payable**
(a)	VSAT with foreign hub (Virtual VSAT Network) C and Ku Bands—	
	An annual fee payable in advance, per each VSAT terminal in full	US$30,00
(b)	VSAT with foreign hub (Virtual VSAT Network) Ka Band—	
	An annual fee payable in advance, per each VSAT terminal in full	US$20,00
(c)	MSS Terminal—	
	An annual fee payable in advance, per each transportable satellite or portable satellite phones (pro-rated for each calendar month or part thereof	US$200,00
(d)	BGAN Terminal—	
	An annual fee payable in advance, per each transportable terminal (pro-rated for each calendar month or part thereof)	US$200,00

VSATs with Local hubs are exempted from annual fee provided the hub is operated by a licenced operator.

4. Other special licences for a fixed period of not more than six months, renewable at the discretion of the Authority**].**

#	**Fees**	**Fees payable**
(a)	Application fee (non- refundable	US$20,00
(b)	An annual fee payable in advance on or before the anniversary date of the licence	US$20,00

5. Number Fees

Number fees shall be assigned in blocks of minimum size of 1000 or 10 000 depending on the size of the exchange. Operators shall pay an annual fee of five cents (US$0, 05) per number for all the blocks allocated.

(1) Operators shall pay number usage fees as outlined below:

#	**Fees**	**Fees payable**
(a)	Application fees for Subscriber number assignment per number unit	US$0,05
(b)	Annual subscriber number usage fees per number unit	US$0,05
(c)	Application fees for Five digit premium service short code	US$1,200,00
(d)	Annual number usage fees for Five digit premium service short code	US$1,200,00
(e)	Application fees for Three digit short code	US$50,00
(f)	Annual number usage fees for Three digit short code	US$50,00
(g)	Application for Special short code other than 5 or 3 digit	US$500,00
(h)	Annual number usage fees for Special short code other than 5 or 3 digit	US$500,00

6. Network Services BFWA Light

#	Fees	Fees payable
(a)	Application fee (non- refundable	US$20,00
(b)	An annual fee payable in advance on or before the anniversary date of the licence	US$20,00

7. Offences and penalty

Any annual fee payable in terms of paragraphs 1, 2, 3, 4, 5, 6, 7, 8 and 9 not paid by the due date shall attract a penalty calculated at the ruling banking rate plus 10% of the payable amount:

Provided that, any annual fee not paid within three months after the due date shall attract a penalty calculated at 100% of the fee payable plus interest calculated at the ruling bank rate. (b) Monthly returns shall be submitted on the date of payment of any fees payable in terms of paragraphs 1, 2, 3, 4, 5, 6, 7, 8, and 9. Failure to submit monthly returns shall attract a penalty of 1% of the payable amount.

8. Private Radio Station Fees and Conditions

Licence		*Conditions of issue*	*Fees in US dollar*
1. Aircraft Station (VHF)	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance/renewal fees for any Aircraft station working within a frequency range of 30 to 300 megahertz, payable on or before expiry of current licence	US$160,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	
2. Aircraft station (HF)	(a)	Application fee (non-refundable)	US$30.,00
	(b)	Issuance/renewal fees for any Aircraft station working within a frequency range of 3 to 30 megahertz. The licence is renewed annually upon payment of renewal fees or before expiry date of current licence	US$180,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	

Licence		*Conditions of issue*	*Fees in US dollar*
3. Amateur station	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance/renewal fees for any Aircraft station. Only one station chargeable per call sign. The licence is renewed annually upon payment of renewal fees on or before expiry of current licence	US$10.,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	
4. Citizen band	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance or renewal fee for a mobile station VHF band using pre assigned frequencies. The licence is renewed annually upon payment of renewal fees on or before expiry of current licence	US$50,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	
5. Walkie talkie	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance/renewal fee for a low power hand held station for two way communication. The licence is renewed annually upon payment of renewal fees on or before expiry of current licence	US$10,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	
6. **Cordless telephone**		(Subject to approved seal of approval)	Free

Licence		*Conditions of issue*	*Fees in US dollar*
Model control	(a)	Application fee (non-refundable)	US$30,00
	(b)	issuance/renewal fees The licence is renewed annually upon payment of renewal fees on or before expiry of current licence	US$90,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	
7. Meteorological Aids	(a)	Application fee (non-refundable)	US$30,00
	(b)	issuance/renewal fees The licence is renewed annually upon payment of renewal fees on or before expiry of current licence	US$90,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	
8. Ship station (VHF)	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance/ Renewal fee for a station authorised to work a maritime private enterprise radio communication system in the frequency range of 30 to 300 megahertz. The licence is renewed annually upon payment of renewal fees or before expiry date of current licence	US$90,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	

Licence		*Conditions of issue*	*Fees in US dollar*
9. Ship station (HF)	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance/renewal fee for a station authorised to work a maritime private enterprise radio communication system in the frequency range of 3 to 30 megahertz. The licence is renewed annually upon payment of renewal fees or before expiry date of current licence	US$90,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	
10. VHF	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance/ renewal fee for a station mobile or fixed not defined above and including paging transmitters authorised to work in the frequency range of 30 to 300 megahertz. The licence is renewed annually upon payment of renewal fees or before expiry date of current licence	US$10,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	
11. HF local)	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance/renewal fee for a station mobile or fixed not defined above and including paging transmitters authorised to work in the frequency range of 3 to 30 megahertz. The licence is renewed annually upon payment of renewal fees or before expiry date of current licence	US$50,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	

Licence		*Conditions of issue*	*Fees in US dollar*
12. HF (cross boarder)	(a)	Application fee (non-refundable)	US$30,00
	(b)	Issuance/ renewal fee for a station mobile or fixed not defined above and authorised to work in the frequency range of 3 to 30 megahertz across borders. The licence is renewed annually upon payment of renewal fees or before expiry date of current licence	US$150,00
	(c)	Frequency User fees calculated using the formula specified in paragraph 1(d) of Part 1	

Renewal fees for annual licences payable in terms of sections *1,2,3,4,5,6,7,8,9,10,11 and 12*, of Part II not paid on or before the expiry date of the current licence shall attract a penalty of 100% of the licence fee plus interest calculated at the ruling bank rate.

9. Radio services

Services	*Fees in US dollar*
1. Relocation of existing station/network . .	US $ 15,00
2. Addition of radios to existing network . .	US $ 15,00
3. Type approval of radio equipment . .	US$ 500,00
4. Registration as a Radio Dealer . . .	US$120,00
5. Renewal of Radio Dealer Certificate . .	US$100,00
6. Application to sit for Amateur Radio Examination Certificate	US$ 10,00
7. Issue of duplicate Certificate of Competency .	US$ 20,00
8. Inspection of newly established Amateur station	US$ 50,00
9. Inspection in connection with interference where apparatus is found to be faulty or inadequately maintained	US$200,00

THIRD SCHEDULE (*Section 50*)

Schedule of Spectrum Access Fees

Spectrum Band	Total Spectrum Available	Size of Spectrum Block (MHz)	Price Per MHz	Number of Blocks
700 MHz	2 x 30 MHz (FDD)	5	$2,959,562.8415	6
800 MHz	2 x 30 MHz (FDD)	5	$2,959,562.8415	6
900 MHz	35 MHz (FDD)	5	$2,959,562.8415	7
1800 MHz	75 MHz (TDD)	5	$2,959,562.8415	15
2100 MHz	60 MHz (FDD)	5	$2,959,562.8415	12
2300 MHz	100 MHz (TDD)	5	$1,275,000.00	20
2500 MHz	70 MHz (FDD)	5	$1,275,000.00	14
	50 MHz (TDD)	5	$2,959,562.8415	10
3500 MHz	2 x 80 MHz (FDD)	5	$2,550,000.00	16

* FDD means Frequency Division Duplex

*TDD means Time Division Duplex

FOURTH SCHEDULE (*Sections 14, 30, 50 and 52*)

Schedule of Frequency Usage fees

Spectrum location	**Fee/kHz (USD)**	**Service Factor**	
		(Private)	(Public)
0.008 < frequency band < 30 MHz	13.33	1.05	1
30 < frequency band <70 MHz	3.20	1.05	1
70 < frequency band < 470 MHz	3.20	1.2	1
470 < frequency band < 694 MHz	3.20	1.5	1
694 < frequency band <960 MHz	0.25	2.0	1
960 < frequency band <2,690 MHz	0.25	2.0	1
2.69 < frequency band < 5.0 GHz	0.05	1.05	1

Spectrum location	**Fee/kHz (USD)**	**Service Factor**	
		(Private)	(Public)
5.0 < frequency band < 8.5 GHz	0.05	3.0	1
8.5 < frequency band < 14.5 GHz	0.05	2.0	1
14.5 < frequency band < 19.0 GHz	0.05	1.05	1
19 < frequency band < 39 GHz	0.025	1.0	1
39 GHz < frequency band	0.025	0.5	1

Spectrum Fee/ Channel = RFBW (kHz) * [Fee/kHz] * [Service Factor] * [Reuse Factor] * [Sharing Factor]

Where:

"*Spectrum Fee / Channel*" is the fee payable in respect of a frequency together with the assigned bandwidth in a communication link. A Frequency Division Duplex (FDD) link is considered to be two channels;

"*Radio Frequency Bandwidth RFBW"* is the actual bandwidth occupied by channel;

"*Reuse Factor*" is the coefficient taking into account the number of times a frequency is reused in Zimbabwe. To encourage the efficient usage of spectrum, the ceiling for the chargeable reuse factor is pegged at 8, meaning that any reuse beyond 8 does not contribute to the spectrum fee.

"Sharing Factor" is the coefficient of the number of users sharing the same frequency in the same charging area. It is established as follows—

When two users share, a sharing factor of 0.8 shall apply
When three users share, a sharing factor of 0.7 shall apply
When four users share, a sharing factor of 0.65 shall apply

Offences and penalties

Any annual fee payable in terms of paragraphs *1, 2, 3, 4, 5, 6, 7 and 8* not paid by the due date, shall attract a penalty calculated at the prescribed rate of interest plus 12.5% of the payable amount:

Provided that, any annual fee not paid within three months after the due date, shall attract a penalty calculated at 100% of the fee payable, plus interest calculated at the prescribed rate of interest.

FIFTH SCHEDULE (*Section 9*)

Conditions Applicable to Broadband Wireless Access Systems in the 2.4 and 5GHz Band

(1) Operators of equipment under this section shall provide the following parameters per installation:

(i) Transmitter Location

(ii) Band of Operation

(iii) Mode of Operation (Point to Point or Point to Multipoint)

(iv) Transmit Power (EIRP)

(v) Antenna Height

(2) The following conditions will apply:

(i) Spectrum in the ISM bands is accessed on a no-protection basis by Broadband Wireless Access (BWA) systems.

(ii) Any person shall be allowed access to BFWA spectrum under the light licensing regime, subject to application and.

(iii) payment of the prescribed fees.

(iv) Approval of applications shall be subject to the need to mantain acceptable levels of quality of service for Public.

(v) Networks and the need to maintain low levels of congestion in the bands across all geographical regions.

(vi) Installation within 20km of the Zimbabwean Border shall be coordinated with the neighbouring country through the.

(vii) Authority before installation of equipment.

(viii) All Point to Point installations shall adhere to International Commission on Non Ionising Radiation Protection (ICNIRP).

(ix) guidelines and should be installed by qualified personnel.

Test

Schedule of Power Limits for the 2.4GHz and 5GHz Bands (BFWA Systems)

Topology Parameter	**P-MP (Point-to Multipoint)**	**P-P (Point-to-Point)**	**Mesh**	**AP-MP (Any point–to-Multipoint)**
Frequency band	5725 MHz to 5850 MHz			
Radio service Fixed	Fixed			

Topology Parameter	**P-MP (Point-to Multipoint)**	**P-P (Point-to-Point)**	**Mesh**	**AP-MP (Any point–to-Multipoint)**
Application	Fixed Wireless Access			
Maximum mean e.i.r.p.	36 dBm* (4W)	36 dBm * (4W)	33 dBm (2W)	33 dBm (2W)
Maximum mean e.i.r.p. density	23 dBm/MHz	23 dBm/ MHz	20 dBm/ MHz	20 dBm/MHz
TPC range for each station	12dB	12dB	12dB	12dB
Dynamic Frequency Selection	mandatory	mandatory	mandatory	Mandatory
Duplex Type	TDD	TDD	TDD	TDD

Topology Parameter	P-MP (Point-to-Multipoint)	P-P (Point-to-Point)	Mesh	AP-MP (Any point- to – Multipoint)o-
Frequency band	5725 MHz to 5850 MHz			
Radio service Fixed	Fixed			
Application	Fixed Wireless Access			

Frequency Band	Proposed New Permission
2400 – 2483.5 MHz	*36dBm with option for higher e.i.r.p through higher antenna gain, for systems.
5150 – 5350 MHz	200mW max EIRP 50m radius P - MP Indoor use only DFS and TPC Mandatory No Pt – Pt.
5470 – 5725 MHz	1000mW max EIRP 300m radius P – MP Both Indoor and Outdoor DFS and TPC Mandatory No Pt – Pt.

5725 – 5850 MHz	*36dBm for urban Both Indoor and Outdoor DFS and TPC Mandatory 36dBm with option for higher e.i.r.p through higher antenna gain, for rural BFWA systems

Topology Parameter	P-MP (Point-to Multipoint)	P-P (Point-to-Point)	Mesh	AP-MP (Any point-to-Multipoint)
Frequency band	5725 MHz to 5850 MHz			
Radio service Fixed	Fixed			
Application	Fixed Wireless Access			

SIXTH SCHEDULE (*Section 49*)

Schedule for ultra-wide and short range devices parameters

Frequency range	**Usage**	**Transmit power/ Magnetic field**	**Duty cycle[1]**	**Channel spacing**	**Reference**
9 kHz – 59.75 kHz	Inductive applications	72 dBµA/m at 10m			EN 300 330
59.75 kHz – 60.25 kHz	Inductive applications	42 dBµA/m at 10m			EN 300 330
60.25 kHz - 90 kHz	Inductive applications	72 dBµA/m at 10m			EN 300 330
9 kHz - 315 kHz	Active Medical Implants and their associated peripherals	30 dBμA/m at 10m	≤ 10 %		EN 302 195
90 kHz - 140 kHz	Inductive applications	42 dBµA/m at 10m			EN 300 330
140 kHz - 148.5 kHz	Inductive applications	37.7 dBμA/m at 10m			EN 300 330

[1]Duty cycle technical details should be taken from the mentioned reference documents in the table.

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
148.5 kHz - 5000 kHz	Inductive applications	-15 dBμA/m at 10 m			EN 300 330
315 kHz- 600 kHz	Active Medical Implants and their associated peripherals	-5 dBμA/m at 10m	≤ 10 %		EN 302 536
400 kHz - 600 kHz	Inductive applications	-8 dBμA/m at 10 m			EN 300 330
456.9 kHz - 457.1 kHz	Tracking, tracing and data acquisition	7 dBμA/m at 10 m		No modulation allowed	EN 300 718
3155 kHz - 3400 kHz	Inductive applications	13.5 dBμA/m at 10m			EN 300 330
5000 kHz - 30 MHz	Inductive applications	-20 dBμA/m at 10 m			EN 300 330
6765 kHz - 6795 kHz	Non-specific short range devices	42 dBμA/m at 10m			EN 300 330
7400 kHz - 8800 kHz	Inductive applications	9 dBμA/m at 10m			EN 300 330
10200 kHz - 11000 kHz	Inductive applications	9 dBμA/m at 10m			EN 300 330
11810 kHz - 12660 kHz	Inductive applications	-16 dBμA/m at 10m			EN 300 330
12500 kHz - 20000 kHz	Active Medical Implants and their associated peripherals	-7 dBμA/m at 10m	≤ 10 %		EN 300 330
13553 kHz - 13567 kHz	Non-specific short range devices	42 dBμA/m at 10m			EN 300 330
	RFID and EAS	60 dBμA/m at 10m			EN 300 330
13567 kHz - 13660 kHz	Inductive applications	27 dBμA/m at 10m			EN 300 330

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
13660 kHz - 13710 kHz	Inductive applications	9 dBμA/m at 10m			EN 300 330
13710 kHz - 14010 kHz	Inductive applications	-3.5 dBμA/m at 10m			EN 300 330
14010 kHz - 14460 kHz	Inductive applications	-10 dBμA/m at 10m			EN 300 330
14460 kHz - 15310 kHz	Inductive applications	-16 dBμA/m at 10m			EN 300 330
26957 kHz - 27283 kHz	Non-specific short range devices	42 dBμA/m at 10 m 10 mW e.r.p			EN 300 330
26995, 27045, 27095, 27145, 27195 kHz	Non-specific short range devices	100 mW e.r.p	≤ 0.1 %	≤ 10 kHz	EN 300 220
29.7 MHz - 47.0 MHz	Radio microphone applications	10 mW e.r.p		≤ 50 kHz	EN 300 422
30 MHz - 37.5 MHz	Active Medical Implants and their associated peripherals	1 mW e.r.p	≤ 10 %		EN 302 510
34.995 MHz - 35.225 MHz	Model control	100 mW e.r.p		10 kHz	EN 300 220
40.66 MHz - 40.7 MHz	Non-specific short range devices	10 mW e.r.p			EN 300 220
40.665, 40.675, 40.685, 40.695 MHz	Model control	100 mW e.r.p		≤ 10 kHz	EN 300 220
	Cordless Telephony				
	Cordless Telephony				
72 MHz - 72.25 MHz	Model control	10 mW e.r.p		≤ 10 kHz	EN 300 220
87.5 MHz - 108 MHz	Wireless audio applications	50 nW e.r.p		≤ 200 kHz	EN 301 357

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
138.2 MHz - 138.45 MHz	Non-specific short range devices	≤ 10 mW e.r.p			EN 300 220
169.4 MHz - 169.475 MHz	Non-specific short range devices	10 mW e.r.p	≤ 0.1 %		EN 300 220
	Tracking, tracing and data acquisition	500 mW e.r.p	≤ 10 %	≤ 50 kHz	EN 300 220
	Aids for the hearing impaired	500 mW e.r.p	≤ 10 %	≤ 50 kHz	EN 300 422
169.475 MHz - 169.4875 MHz	Non-specific	10 mW e.r.p	≤ 0.1 %		EN 300 220
	Aids for the hearing impaired	10 mW e.r.p		≤ 50 kHz	EN 300 422
169.4875 MHz - 169.5875 MHz	Non specific short range devices	10 mW e.r.p	≤ 0.001% (06h00 - 24h00) ≤ 0.1% (00h00 - 06h00)	Non-specific	EN 300 220
	Aids for the hearing impaired	500 mW e.r.p		≤ 50 kHz	EN 300 422
169.5875 MHz - 169.8125 MHz	Non-specific short range devices	10 mW e.r.p	≤ 0.1 %		EN 300 220
	Aids for the hearing impaired	10 mW e.r.p		≤ 50 kHz	EN 300 422
169.4 MHz - 174 MHz	Aids for the hearing impaired	10 mW e.r.p		≤ 50 kHz	EN 300 422
312 MHz - 315 MHz	Keyless car entry	50 mW e.r.p			EN 300 220
401 MHz - 402 MHz	Active Medical Implants and their associated peripherals	25 uW e.r.p		≤ 100 kHz	EN 302 537
402 MHz – 405 MHz	Active Medical Implants and their associated peripherals	25 uW e.r.p		≤ 300 kHz	EN 301 839

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
405 MHz - 406 MHz	Active Medical Implants and their associated peripherals	25 uW e.r.p		≤ 100 kHz	EN 302 537
433.05 MHz - 434.79 MHz	Non-specific short range devices	1 mW e.r.p			EN 300 220
	Non-specific short range devices	10 mW e.r.p	≤ 10 %		EN 300 220
	LPD 433	10 mW e.r.p		25 kHz	EN 300 220
446 MHz - 446.2 MHz	PMR 446	500 mW		12.5kHz	TS 102 490
823 MHz – 826 MHz	Radio microphones and IEM	Maximum 20 mW e.i.r.p.			
826 MHz – 832 MHz	Radio microphones and IEM	Maximum 100 mW e.i.r.p.			
863 MHz – 870 MHz	Radio microphones and IEM	Maximum 50 mW e.i.r.p.			
863 MHz - 870 MHz	Non-specific short range devices	25 mW e.r.p	≤ 0.1 % or LBT		EN 300 220
	SRD860	10 mW e.r.p		25 kHz	
865 MHz – 868 MHz	Tracking, tracing & data acquisition	500 mW e.r.p. Transmissions only permitted within the bands: 865,6- 865,8 MHz, 866,2-866,4 MHz, 866,8-867,0 MHz and 867,4- 867,6 MHz. and with use of APC	≤ 10 % for network access points 2,5 % otherwise	≤ 200 kHz	EN 300 220

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
868.7 MHz – 869.2 MHz	Automatic Meter Reading	25 mW e.r.p			EN 300 220
869.4 MHz - 869.65 MHz	Non-specific short range devices	500 mW e.r.p	≤ 10% or LBT +AFA	≤ 25 kHz.[2]	EN 300 220
865 MHz - 865.6 MHz	RFID	100 mW e.r.p		≤ 200 kHz	EN 302 208
865.6 MHz - 867.6 MHz	RFID	2 W e.r.p		≤ 200 kHz	EN 302 208
867.6 MHz - 868 MHz	RFID	500 mW e.r.p		≤ 200 kHz	EN 302 208
868 MHz-868.6 MHz	Non-specific short range devices	25 mW e.r.p	≤ 1 % or LBT +AFA		EN 300 220
870 MHz - 875.4 MHz	Non-specific short range devices	10 mW e.r.p			EN 300 220
870 MHz - 875.8 MHz	Non-specific short range devices	25 mW e.r.p	≤ 1 %	≤ 600 kHz	EN 300 220
870 MHz - 876 MHz	Non-specific short range devices	25 mW e.r.p	≤ 0.1 %	≤ 200 kHz	EN 300 220
870 MHz - 875.6 MHz	Tracking, tracing and data acquisition	500 mW e.r.p and APC	≤ 10 % for network access points ≤ 2,5 % other-wise	≤ 200 kHz	EN 303 204
870 MHz - 875.8 MHz	Transport and traffic telematics	500 mW e.r.p (vehicle to vehicle) 100 mW e.r.p. (in vehicle application)	≤ 0.1 %	≤ 500 kHz	EN 300 200

[2]The completely state frequency band may be used as one wideband channel for high-speed date transmission.

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
915 MHz - 921 MHz	Non-specific short range devices	25 mW e.r.p	≤ 0.1 %	≤ 200 kHz	EN 300 220
915.2 MHz– 920.8 MHz	Non-specific short range devices	25 mW e.r.p. except for the 4 channels identified in note where 100 mW e.r.p. applies[3]	≤ 1%	≤ 600 kHz except for the 4 channels identified in note where # 400 kHz applies	EN 300 220
915 MHz - 921 MHz	RFID	4 W e.r.p		≤ 400 kHz	EN 302 208
1785 MHz - 1804.8 MHz	Radio microphone applications and IEM	50 mW e.i.r.p			EN 300 422
1795 MHz - 1800 MHz	Wireless audio applications	20 mW e.i.r.p			EN 301 357
1880 MHz - 1900 MHz	DECT applications including Cordless Telephony Radio microphones Using DECT technology only	250 mW e.i.r.p			ITU-R M.1033-1 EN 300 175
2400 MHz – 2483.5 MHz	Wideband Data Transmission (e.g. WLAN, PMR over WLAN)	100 mW e.i.r.p.			EN 300 328
	Non specific short range	10 mW e.i.r.p			EN 300 440
	devices				
	Radiodetermination applications	25 mW e.i.r.p			EN 300 440

[3]The applicable channel centre frequencies are 916.3 MHz, M918.5MHz, 918.7MHz and 919.9MHz. The channel bound north is 400kHz.

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
2483.5 MHz – 2500 MHz	Active Medical Implants	10 dBm e.i.r.p			EN 301 559
4500 MHz - 7000 MHz	Tank level probing radar	-41.3 dBm/ MHz e.i.r.p. outside the enclosed test tank structure			EN 302 372
5150 MHz - 5250 MHz	Broadband Radio Access Networks (e.g. RLAN).	100 mW e.i.r.p without TPC 200 mW e.i.r.p with TPC			EN 301 893 TPC: EN 301 893
5250 MHz - 5350 MHz	Broadband Radio Access Networks (e.g. RLAN).	100 mW e.i.r.p without TPC 200 mW e.i.r.p with TPC			EN 301 893 TPC/DFS: EN 301 893 (Table D.1)
5470 MHz - 5725 MHz	Broadband Radio Access Networks (e.g. RLAN)	500 mW e.i.r.p without TPC 1W e.i.r.p with TPC and DFS[4]			EN 301 893 TPC/DFS: EN 301 893 (Table D.1)
5725 MHz – 5875 MHz	Rural Broadband Wireless Access Systems	2W e.i.r.p (10 MHz channel) 4W e.i.r.p (20 MHz channel)			EN 302 502
5725 MHz - 5875 MHz	Non-specific short range devices	50 mW e.i.r.p			EN 300 440
	Tracking, tracing and data acquisition	400 mW e.i.r.p		≥ 1 MHz and ≤ 20 MHz	EN 303 258
5795 MHz - 5815 MHz	Transport and traffic telematics	2W e.i.r.p			EN 300 674
8500 MHz - 10.6 GHz	Tank level probing radar	-41.3 dBm/ MHz e.i.r.p. outside the enclosed test tank structure			EN 302 372

[4]Slave devices without a Radar Interference Detection shall comply with the limits for the Band 5150MHz-5250.

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
9200 MHz - 9975 MHz	Radiodetermination applications	25 mW e.i.r.p			EN 300 440
10.5 GHz - 10.6 GHz	Radiodetermination applications	500 mW e.i.r.p			EN 300 440
13.4 GHz - 14 GHz	Non-specific short range devices	25 mW e.i.r.p			EN 300 440
17.1 GHz - 17.3 GHz	Non-specific short range devices	100 mW e.i.r.p.			EN 300 440
	Radiodetermination applications	400 mW (26 dBm) e.i.r.p			EN 300 440
24 GHz - 24.25 GHz	Non-specific short range devices	100 mW e.i.r.p			EN 300 440
	Automotive radars[5.]	100 mW e.i.r.p			EN 302 858
57 GHz - 64 GHz	Non-specific short range devices	100 mW e.i.r.p; 13 dBm/MHz e.i.r.p.			EN 305 550
	Tank level probing radar	400 mW (26 dBm) e.i.r.p			EN 302 372
57 GHz - 66 GHz	Broadband Radio Access Networks (e.g. RLAN)	10 W (40 dBm) e.i.r.p	Spec-trum sharing mechanism (e.g. LBT, DAA)		EN 302 567
75 GHz - 85 GHz	Radiodetermination applications	400 mW (26 dBm) e.i.r.p			EN 302 729
76 GHz - 77 GHz	Railway applications and Transport and traffic telematics short-range radar for ground-based applications, including automotive radars.	55 dBm e.i.r.p peak			EN 301 091 ITU-R M.2057

[5]Only valid for existing systems before 1 January 2019.

Frequency range	Usage	Transmit power/ Magnetic field	Duty cycle[1]	Channel spacing	Reference
77 – 81 GHz	short-range radar for ground-based applications, including automotive radars.	55 dBm e.i.r.p peak			EN 302 264
122 GHz - 123 GHz	Non-specific short range devices	100 mW e.i.r.p			EN 305 550
244 GHz - 246 GHz	Non-specific short range devices	100 mW e.i.r.p			EN 305 550
