Section

12. Temporary use of manual receipt or invoice.
13. Conducting investigation.
14. Periodic technical maintenance of Fuel Fiscal Device.

PART VI

Offences and Penalties

15. Failure to acquire or use a Fuel Fiscal Device.
16. Failure to comply with interface requirements.
17. Tampering with Fuel Fiscal Device.
18. Unapproved developers and or suppliers of Fuel Fiscal Devices.
19. Failure to deliver, configure or install Fuel Fiscal Devices by Approved Supplier or Approved Developer.
20. Failure to report faults or errors.
21. Failure by an Approved Supplier and or Approved Developer to rectify faults or errors.
22. Failure to issue Fiscal Invoice or Fiscal Receipt.
23. Failure to close fiscal day.
24. Offences where no specific penalty is provided.

PART VII

General Provisions

25. Powers of the Commissioner or any officer authorised by Commissioner.
26. Revocation of license or certification of Approved Supplier and or approved Developer.
27. Obligation to demand and retain Fiscal Receipts or Fiscal Invoices.
28. Transitional provisions.

First Schedule: Technical Specifications of Fuel Fiscal Devices.

Second Schedule: Procurement, Approval and Licensing of Suppliers and or Developers of Fiscal Devices for the Fuel Sector.

THIRD SCHEDULE: Required Records and Information to Be Generated by Fuel Fiscal Device.

IT is hereby notified that the Minister of Finance, Economic Development and Investment Promotion has, in terms of section 90 as read with section 80DD of the Income Tax Act [*Chapter 23:06*] made the following regulations: —

PART I

PRELIMINARY PROVISIONS

Title

1. These regulations may be cited as the Income Tax (Fiscalised Recording of Fuel Transactions) Regulations, 2026.

Interpretation

2. In these regulations—

"approved developer" means an appointed producer, maker or developer of Virtual Fuel Fiscal Devices;

"approved supplier" means a duly certified and licenced individual, person or organisation in the business of selling, providing, distribution and configuration of Fuel Fiscal Devices as prescribed under section 5;

"Fuel Fiscal Device" means a specialised hardware electronic gadget or machine or Software or Virtual Fiscal Device that is capable of being integrated with a fuel pump and is compatible with the requirements of Fiscalisation Data Management System (FDMS), approved by the Commissioner for the purposes of recording taxpayer's fuel transactions and transmitting to the FDMS; with specifications as detailed in the First Schedule. Virtual Fiscal Device includes Application Programming Interface (APIs), Accounting/Point of Sale (POS) Systems or software-based solutions that are compatible with FDM;

"Fuel Fiscal Devices Technical Committee" means a body established under section 10;

"fiscal day" means the time period or session from where a fiscal device is set up or opened to start recording fiscalised sales transactions, up to the time the fiscal device is set up or closed to stop recording fiscalised sales transactions. For avoidance of doubt, where else not specified, the required maximum fiscal day length should be 24 hours from time of opening the fiscal day on the Fiscal Device;

"opening fiscal day" means setting fiscal device to start a new fiscal day operation, whether or not connected to the internet;

"closing fiscal day" means setting fiscal device to stop or end a fiscal day operation, this process should always be performed while the fiscal device is connected to internet, interfaced with FDMS in an online mode, to allow direct communication with the FDMS;

"fiscal documents" means files or records generated by Fuel Fiscal Devices which includes fiscal receipts, fiscal invoices, credit notes, debit notes, sales reports, amongst others;

"fiscal signature" means any unique fiscal identifiers, including not limited to authentication codes, QR Codes, Bar Codes or electronic endorsement;

"fiscal receipt or fiscal invoice or debit note or credit note" means a document issued by a Fuel Operator, recorded and printed by an interfaced Fuel Fiscal Device and showing the same displayed or printed transaction details with those transmitted to the FDMS;

"Fiscalisation Data Management System (FDMS)" means a Back-End System used by the Commissioner to receive, store, control, process, manage data and information recorded and transmitted by interfaced Fuel Fiscal Devices, and generate various required reports, services or information for the purposes of tax administration;

"fuel transactions" means any activity which involves procurement, sale, movement, transfer, distribution,

uptake, storage or holding of any petroleum products as defined in the Petroleum Act [*Chapter 13:22*];

"interface" means linking of a Fuel Operator's fuel fiscal device to the FDMS;

"Fuel Operator" means any person who is authorised to procure, sell or produce any petroleum product in terms of the Petroleum Act [*Chapter 13:22*];

"Z report" means a summary sales report generated by a Fuel Fiscal Device on a daily, monthly, or annual basis or any specified period as may be required by the Commissioner.

Application

3. These regulations shall apply to all Fuel Operators and Approved Suppliers and Developers in Zimbabwe as defined herein.

PART II

REGISTRATION AND LICENSING

Requirements for registration

4. (1) Every Fuel Operator shall—

(a) acquire appropriate Fuel Fiscal Device (s) from an approved supplier or install Virtual Fuel Fiscal Device(s) which is compatible with the requirements set by the Commissioner and those for the Fiscalisation Data Management System (FDMS);

(b) ensure that the acquired Fuel Fiscal Device is appropriately registered under the Fuel Operator and appropriately interfaced with the FDMS; and

(c) comply with any other requirement as may be specified by written notice by the Commissioner.

Procurement, approval and licensing of Fuel Fiscal Device suppliers and developers

5. (1) No person shall supply a Fuel Fiscal Device to any Fuel Operator unless if they are licensed and approved by the Commissioner as an approved supplier and or approved developer.

(2) Notwithstanding subsection (1), a Fuel Operator may directly procure, install and use Virtual Fiscal Device approved by the Commissioner for the purposes of satisfying the provisions of these regulations.

(3) The Commissioner shall not approve or license any person to be an approved supplier or approved developer of Fuel Fiscal Devices unless that person has—

(a) been certified and licensed through the process specified in the Second Schedule;

(b) registered for tax purpose and is a holder of a valid tax clearance certificate;

(c) a fixed place of abode or permanent establishment or representative taxpayer in Zimbabwe;

(d) a minimum capital of twenty-five thousand United States dollars or its equivalence in local currency, with proof in the form of a bank statement or bank guarantee;

(e) a qualified technical team to install and configure fiscal devices, and train and support Fuel Operators;

(f) satisfied requirements to prototypes and demonstrations of ability to develop Application Programming Interface (APIs) with specifications which comply with FDMS on prototype devices or systems requirements specifications set out in First Schedule; and

(g) any other requirements as may be specified by written notice by the Commissioner.

(4) The Commissioner shall issue a licence to an approved supplier or approved developer which licence shall be valid for a period of three years from the date of issue.

(5) Notwithstanding, any provisions contained herein, the approved supplier or approved developer upon expiry of the licence, may apply for renewal by the Commissioner in the manner specified in the Second Schedule.

(6) The Commissioner may, at his or her discretion, approve or decline the application or the renewal of the Licence.

Approved suppliers and approved developer's rights and obligations

6. (1) The approved suppliers and approved developers shall—

(a) only acquire Virtual Fuel Fiscal Devices from approved or licensed developers;

(b) sell, distribute, supply or configure approved Fuel Fiscal Devices to Fuel Operators;

(c) deliver, install, upgrade or configure the Fuel Fiscal Device within seven days from the date of receipt of full payment by a Fuel Operator;

(d) register all Fuel Fiscal Devices sold to Fuel Operators through the FDMS using Fuel Fiscal Devices serial numbers and Fuel Operator's particulars including Taxpayer Identification Numbers (TIN);

(e) install, configure and activate the supplied Fuel Fiscal Device at the Fuel Operator's premises;

(f) keep stock of spare parts and accessories for a period of not less than five years from the time at which the last Fuel Fiscal Device was supplied;

(g) train Fuel Operators on best ways of administering the Fuel Fiscal Devices for proper and efficient use of the device;

(h) support and maintain the supplied Fuel Fiscal Devices at Fuel Operator's premises to ensure smooth operation and running of the devices;

(i) submit to the Commissioner details of its approved technicians;

(j) enter into a written after-sales-service agreement with the Fuel Operator to ensure provision of maintenance services of Fuel Fiscal Devices;

(k) uphold highest levels of business ethics and professionalism;

(l) ensure API integrity and security on the distributed, configured and installed Fuel Fiscal Devices, to ensure

the sales transactions recorded through the Fuel Fiscal Devices are securely and accurately transmitted to FDMS without any distortion;

(m) establish and operate service centre(s) in every region or province in Zimbabwe;

(n) recommend the most appropriate Fuel Fiscal Device that is suitable to the Fuel Operator's business;

(o) be obliged to recover, resolve any identified, reported or unreported malfunctions, faults, bugs and or errors on deployed, installed or configured Fuel Fiscal Device of Fuel Operators within a maximum of forty-eight hours from the time any malfunctions, faults, bugs and or errors is reported or identified.

(2) An approved supplier shall not—

(a) sell or distribute Fuel Fiscal Devices which are not approved by the Commissioner;

(b) deactivate, revoke any fiscal device licence, disconnect, de-register or distort approved configurations of any Fuel Fiscal Device without the Commissioner's approval; or

(c) work in cahoots with any Fuel Operator to cause malfunctions or prejudice compliance with these regulations by any Fuel Fiscal Device of a Fuel Operator.

(3) An approved supplier shall, within a period not exceeding seven days from the date of reporting, rectify, resolve, or otherwise attend to any identified or reported malfunctions (errors or incidents) affecting Fuel Fiscal Devices of the Fuel Operators.

PART III

Obligations of Fuel Operators

Obligation to record fuel transactions through a Fuel Fiscal Device

7. (1) Every Fuel Operator shall—

(a) acquire Fuel Fiscal Devices from approved suppliers or approved developers;

(b) ensure that all fuel transactions are electronically transmitted into the FDMS through Fuel Fiscal Devices by no later than six months with effect from the date of publication of these regulations:

Provided that in the event of any technical, operational or administrative constraints, the Commissioner may, by public notice, defer the mandatory transmission of transactions until such time as the identified constraint has been addressed;

(c) where a Fuel Fiscal Device is out of use for a period exceeding eight hours due to power interruption, theft, technical fault, approved maintenance, device failure, or any other reason acceptable to the Commissioner—

(i) promptly, and in any case within eight hours of the device becoming inoperative, notify the Commissioner:

Provided that where such interruption or occurrence takes place outside the business operating hours of the Fuel Operator, notification shall be made no later than 800 hours on the next working day; and

(ii) ot use any manual or other backup system of recording transactions except with the approval of the Commissioner:

Provided that if the Commissioner does not respond to such notification within four hours, the Fuel Operator shall use a manual or other backup system of recording transactions and shall enter or upload the transactions into the Fuel Fiscal Device immediately upon restoration of the device or connectivity.

(d) issue a fiscal receipt or fiscal invoice generated by their Fuel Fiscal Device for every transaction:

Provided that every fiscal receipt or fiscal invoice generated in terms of this section shall bear the configured fiscal device signature, fiscal device serial number, and verification code;

(e) in acquiring, keeping, handling, and using Fuel Fiscal Devices, exercise due diligence and a duty of care in accordance with the approved developer's operational manuals to prevent misuse or abuse of the Fuel Fiscal Devices;

(f) be equipped with an emergency or backup power supply capable of lasting at least eight hours from the time the main power supply ceases:

Provided that in the case of a network of Fuel Fiscal Devices, the emergency or backup power supply shall be capable of powering all devices in the network for the prescribed period—

(g) acquire a new Fuel Fiscal Device within seven days from the expiration of thirty days if the Fuel Fiscal Device for the Fuel Operator remains in an error state for a period exceeding thirty days;

(h) ensure that all the fuel transactions recorded are transmitted to the FDMS before any replacement, repair or de-registration of Fuel Fiscal Device;

(i) ensure successful closure of fiscal day on every Fuel Fiscal Device used by the Fuel Operator on or before the provided maximum fiscal day length configured on the Fuel Fiscal Device as per the FDMS settings. For avoidance of doubt, where else not specified, maximum fiscal day length should be twenty-four hours from time of opening the fiscal day on the Fuel Fiscal Device.

(2) Notwithstanding subsection (1)(b), the Commissioner may approve a Fuel Operator to directly procure, install and use Virtual Fiscal Device for the purposes of satisfying the provisions of these regulations.

Debit and credit notes

8. (1) Every Fuel Operator who mistakenly enters erroneous data, or where a supply has been cancelled or adjusted for any other reason acceptable by the Commissioner, into his or her Fuel Fiscal Device, shall proceed to print the original information and keep the record thereof.

(2) Subject to subsection (1), the Fuel Operator shall proceed to raise a credit or debit note, as the case may be.

(3) Subject to subsection (1) and (2) the Fuel Operator shall enter the correct data and information into its Fuel Fiscal Device and issue a correct fiscal receipt or fiscal invoice.

(4) Every Fuel Operator shall report errors referred to under subsection (1) at the time of filing a return of income for the year, by submitting to the Commissioner a written statement of each correction made, recording each sales adjustment done during the year for reconciliation purposes.

PART IV

Fuel Fiscal Device Operations

Fuel Fiscal Device Operation

9. (1) Every Fuel Fiscal Device supplied to a Fuel Operator by an Approved Supplier and or Approved Developer shall be compliant with specifications set out in the First Schedule and capable of performing the following electronic operations—

(a) receiving, manipulating, transmitting to the system, storing, and printing information as entered by the Fuel Operator;

(b) recording sales and issuing fiscal receipts or fiscal invoices in the form and manner specified under the Third Schedule;

(c) recording business transactions in the currency used in each transaction, with the capability to record multiple currencies;

(d) maintaining fiscal memory as readonly, capable of securely storing data for a period of not less than six years;

(e) preventing the reversal of entered sales data or any other information, including dates;

(f) generating inbuilt reconnection reports of fiscal memory;

(g) utilising paper rolls of sufficient width to capture all required details of Fuel Operators' business transactions;

(h) preventing the deletion of any information or data entered into the device;

(i) generating an alarm to alert the Fuel Operator in the event of memory disconnection;

(j) receiving and displaying alert messages in respect of any malpractice, error, or inconsistent action detected in the system;

(k) allowing the Commissioner to view, read, and print all ongoing daily business transactions performed by Fuel Operators;

(l) providing an inbuilt link to enable connection between the Fuel Operator and the FDMS;

(m) incorporating security features for both hardware and software;

(n) enabling instant recording of sales via an electronic journal, instant issuance of fiscal receipts or fiscal invoices, and instant storage of tax information;

(o) generating Z-sales reports; and

(p) recording any errors that occur in the course of the Fuel Operators' transactions.

PART V

Administration

Establishment and functions of Technical Committee

10. (1) The Minister shall establish a Fuel Fiscal Device Technical Committee to advise on technical aspects relating to the procurement, approval of suppliers of fiscal devices, and administration of these regulations.

(2) The Minister shall appoint not fewer than five persons drawn from such relevant institutions as may be considered necessary to constitute the Fuel Fiscal Device Technical Committee, which shall be responsible for guiding procurement processes, selection, approval of developers and approval of suppliers and devices, and addressing other technical matters pertaining to these regulations.

(3) The Technical Committee established in terms of subsection (1) shall comprise representatives from the following institutions—

(a) the Ministry of Finance Economic Development and Investment Promotion;

(b) the Zimbabwe Revenue Authority established in terms of section 3 of the Revenue Authority Act (*Chapter 23:11*);

(c) the Zimbabwe Energy Regulatory Authority established in terms of section 3 of the Petroleum Act (*Chapter 13:22*); and

(d) any other person that the Minister may appoint as considered necessary.

(4) The representative members referred to in subsection (3) shall be appointed for their knowledge of and experience in fields such as information technology, finance, commerce, economics, taxation, or law.

(5) The Fuel Fiscal Device Technical Committee shall advise the Minister on—

(a) matters relating to the governance and operationalisation of Fuel Fiscal Devices;

(b) the approval of Fuel Fiscal Device Suppliers and or Developers upon satisfaction of specified technical and functional requirements;

(c) the inspection of prototype Fuel Fiscal Devices proposed for sale, distribution, or supply in Zimbabwe by suppliers or developers prior to approval;

(d) the rejection of defective Fuel Fiscal Devices;

(e) the revocation of licences of Approved Suppliers or Approved Developers in accordance with these regulations; and

(f) any requirements of the Commissioner.

(6) The Fuel Fiscal Device Technical Committee shall submit reports to the Minister at such intervals as the Minister may require.

(7) The Minister shall by notice in the *Gazette* publish a list of Approved Suppliers and or Approved Developers.

(8) Notwithstanding subsection (5) above, and without the Fuel Fiscal Device Technical Committee, the Commissioner may recommend to the Minister for approval of Developers of Virtual Fiscal

Devices upon satisfaction and successful tests of compatibility with FDMS and requirements detailed in the First and Third Schedule.

(9) A member of the Fuel Fiscal Device Technical Committee who has any direct or indirect financial, commercial or personal interest in any supplier, developer, Fuel Operator or device under consideration shall disclose such interest prior to deliberation.

(10) A member who has disclosed an interest under subsection (9) shall recuse himself or herself from deliberations and decision-making relating to that matter, and such recusal shall be recorded in the minutes of the Committee.

Safe keeping of records

11. (1) Every Fuel Operator shall ensure that all records entered into their Fuel Fiscal Device are safely kept and secured using such authorised security measures as may be recommended by the Commissioner.

(2) No Fuel Operator shall tamper with any records stored in a Fuel Fiscal Device, and every Fuel Operator shall ensure that such records are retained in the Fuel Fiscal Device and accessible to the Commissioner for a period of not less than six years.

Temporary use of manual receipt or invoice

12. (1) A Fuel Operator may, with the prior approval of the Commissioner, temporarily transact business using manual receipts for a period not exceeding thirty days where—

(a) the Fuel Fiscal Device is undergoing inspection, approved maintenance and or seized for investigative purposes;

(b) the Fuel Operator has reported to the Commissioner that the Fuel Fiscal Device has failed to operate for any reason acceptable to the Commissioner in terms of section 7(1)(c).

(2) Where a Fuel Fiscal Device is restored or replaced, the Fuel Operator shall, at the commencement of its operation, enter into the Fuel Fiscal Device all information recorded manually and ensure that it is fiscalised and transmitted to FDMS.

Conducting investigation

13. (1) The Commissioner may conduct an investigation into the affairs of any Fuel Operator where he or she has reasonable grounds to believe that the Fuel Operator has contravened any provision of the Act or these regulations in the use of a Fuel Fiscal Device.

(2) Where, in the course of an investigation conducted in terms of subsection (1), the Commissioner discovers that any provision of the Act or these regulations has been infringed, the Commissioner shall notify the Fuel Operator in writing of—

(a) the nature and extent of the infringement; and

(b) the consequences of such infringement.

(3) A Fuel Operator who receives a notice referred to in subsection (2) may, within seven days of receipt of the notice—

(a) deny the allegations in writing; or

(b) request, in writing, that the Commissioner compound any of the detected offences in accordance with the provisions of the Act and these regulations.

(4) Where a Fuel Operator denies the allegations in terms of subsection (3)(a), the Commissioner may institute legal proceedings against the Fuel Operator as he or she may deem appropriate.

Periodic technical maintenance of Fuel Fiscal Device

14. (1) The Commissioner shall prescribe periodic timeframes for the technical maintenance of Fuel Fiscal Devices and or FDMS by issuing a public notice.

(2) Every Fuel Operator shall ensure that each Fuel Fiscal Device in their possession undergoes technical maintenance within the timeframes provided by the Commissioner.

(3) Technical maintenance services required under subsection (2) shall be performed only by a qualified approved technician who holds an order of approval to provide maintenance services for the relevant model of Fuel Fiscal Device.

(4) No exceptional (nonperiodic) maintenance service of a Fuel Fiscal Device shall be conducted unless the Fuel Operator has

submitted a written notice of request to the approved supplier, with a copy to the Commissioner, specifying the Fuel Operator's physical address and the nature of the maintenance requested.

(5) The cost of periodic maintenance of Fuel Fiscal Devices shall be borne by the Fuel Operator responsible for the device.

(6) Every supplier shall, immediately upon appointing an approved technician or any other person to perform maintenance services under their supervision, notify the Commissioner in writing of the name, qualifications, and authorisation of such technician, and the Commissioner shall enter the name of that technician in the list of suppliers.

(7) Where the Commissioner has reasonable grounds to believe that an approved technician is incapable of performing the duties required under these regulations, the Commissioner may prohibit such technician from conducting maintenance of Fuel Fiscal Devices or from engaging in any activity relating to the administration of these regulations, and shall remove the name of that technician from the list of approved technicians.

(8) Both the supplier and the Fuel Operator shall notify the Commissioner in writing of each technical maintenance service performed on a Fuel Fiscal Device within fourteen days from the date on which such maintenance was conducted.

PART VI

Offences and Penalties

Failure to acquire or use Fuel Fiscal Device

15. (1) Any Fuel Operator who fails to acquire or install, a Fuel Fiscal Device as required under these regulations shall be liable to closure of the fuel business until the Fuel Operator regularises in terms of these regulations.

(2) Any Fuel Operator who fails to record fuel transactions through a Fuel Fiscal Device as required under these regulations shall be—

(a) liable to a civil penalty of one thousand United States dollars per point of sale not using a Fuel Fiscal Device

or its equivalent in local currency on the day of raising the penalty assessment; and

(b) liable to a further civil penalty of twentyfive United States dollars or its equivalent in local currency, per point of sale or fuel fiscal device, for each day the Fuel Operator remains in default in paying the penalty referred to in paragraph (a), for a period not exceeding ninety days; and

(c) liable to a further civil penalty of twentyfive United States dollars or its equivalent in local currency on the day of raising the penalty assessment, per point of sale or fuel fiscal device, for each day the Fuel Operator remains in default in recording fuel transactions through a Fuel Fiscal Device, for a period not exceeding ninety days.

(3) Where a Fuel Operator remains in default after the period specified in subsection (2)(c), that Fuel Operator shall be guilty of an offence and liable to a fine not exceeding level seven or imprisonment for a period not exceeding twelve months or both such fine and such imprisonment.

Failure to comply with interface requirements

16. (1) Any Fuel Operator whose Fuel Fiscal Device is not interfaced within—

(a) the period specified in section 7 the Commissioner requires the Fuel Operator to acquire and interface a fiscal device; or

(b) thirty days from the date of registration as a taxpayer under the Act or commencement of business, whichever is earlier;

shall be—

(i) liable to a civil penalty of twentyfive United States dollars or its equivalent in local currency on the day of raising the penalty assessment, per point of sale or Fuel Fiscal Device, for each day the Fuel Operator remains in default in interfacing the Fuel Fiscal Device, for a period not exceeding ninety days:

Provided that the Commissioner may waive or refund the whole or part of any penalty imposed under this paragraph if satisfied that the contravention was not wilful or was not due to a want of reasonable care; and

(ii) liable to a further civil penalty of twentyfive United States dollars or its equivalent in local currency on the day of raising the penalty assessment, per point of sale or Fuel Fiscal Device, for each day the Fuel Operator remains in default in paying the penalty referred to in paragraph (a), for a period not exceeding ninety days.

(2) Where a Fuel Operator continues to be in default after the period specified in subsection (1), that Fuel Operator shall be guilty of an offence and liable to a fine not exceeding level seven or imprisonment for a period not exceeding twelve months or both such fine and such imprisonment.

Tampering with Fuel Fiscal Device

17. (1) Any Fuel Operator who deliberately tampers with or causes a Fuel Fiscal Device not to function properly shall be guilty of an offence and—

(a) liable to a civil penalty of one thousand United States dollars or its equivalent in local currency on the day of raising the penalty assessment, per point of sale or fuel fiscal device tampered with, or three times the amount of taxes involved, whichever is higher;

(b) liable to a civil penalty of fifty United States dollars or its equivalent in local currency on the day of raising the penalty assessment, per point of sale or fuel fiscal device, for each day the Fuel Operator remains in default in paying the penalty referred to in paragraph (a), for a period not exceeding ninety days;

(c) liable to a civil penalty of fifty United States dollars or its equivalent in local currency on the day of raising the penalty assessment, per point of sale or fuel fiscal device, for each day the Fuel Operator remains in default

in taking remedial action to correct the tampered device, for a period not exceeding ninety days.

(2) Where the Fuel Operator continues in default after the period specified in paragraph (c), shall be liable to a fine not exceeding level seven or imprisonment for a period not exceeding twelve months or both such fine and such imprisonment.

Unapproved developers and or suppliers of Fuel Fiscal Devices

18. Any person who manufactures, sells or distributes any device purporting to be a Fuel Fiscal Device without obtaining the approval required under section 5 shall be guilty of an offence and liable to a penalty not exceeding twenty thousand United States Dollars or equivalent in local currency on the day of raising the penalty assessment.

Failure to deliver, configure or install Fuel Fiscal Device by Approved Supplier or Approved Developer

19. (1) Any Approved Supplier and or Approved Developer who fails to deliver, configure, or install a Fuel Fiscal Device within seven days of receiving an order and full payment from a Fuel Operator shall be liable to a civil penalty of one hundred United States dollars or its equivalent in local currency on the day of raising the penalty assessment for each day the approved supplier remains in default, for a period not exceeding ninety days:

Provided that the Commissioner may waive or refund the whole or part of any penalty imposed under this subsection if satisfied that the contravention was not wilful or was not due to a want of reasonable care.

(2) Where an Approved Supplier or Approved Developer continues to be in default after the period specified in subsection (1), the supplier shall be guilty of an offence and liable to a fine not exceeding level seven or imprisonment for a period not exceeding twelve months or both such fine and such imprisonment.

Failure to report faults or errors

20. (1) Any Fuel Operator who fails to report faults as required under section 7 shall be liable to a civil penalty of twenty-five United

States dollars or its equivalent in local currency on the day of raising the penalty assessment, per point of sale or Fuel Fiscal Device, for each day the Fuel Operator remains in default in reporting the fault or error, for a period not exceeding ninety days.

(2) Any Fuel Operator who fails to rectify a reported fault or error within a period of thirty days shall be liable to a further civil penalty of twentyfive United States dollars or its equivalent in local currency on the day of raising the penalty assessment, per point of sale or Fuel Fiscal Device, for each day the Fuel Operator remains in default in rectifying the fault or error, for a period not exceeding ninety days.

(3) Where a Fuel Operator continues in default after the period specified in subsection (1) or (2), that Fuel Operator shall be guilty of an offence and liable to a fine not exceeding level 7 or imprisonment for a period not exceeding twelve months or both such fine and such imprisonment.

Failure by Approved Supplier and or Approved Developer to rectify reported faults or errors

21. (1) Any Approved Supplier or Approved Developer who fails to rectify faults or errors reported by Fuel Operators in respect of Fuel Fiscal Devices supplied by such Approved Supplier or Approved Developer within seven days from the date on which the fault or error was reported, shall be liable to a civil penalty of twentyfive United States dollars or its equivalent in local currency on the day of raising the penalty assessment for each day the fiscal device remains unrectified , faulty, or in error, up to a maximum of ninety days.

(2) Where an Approved Supplier or Approved Developer continues in default after the period specified in subsection (1), the Approved Supplier or Approved Developer shall be guilty of an offence and liable to a fine not exceeding level seven or imprisonment for a period not exceeding twelve months or both such fine and such imprisonment.

Failure to issue Fiscal Invoice or Fiscal Receipt

22. (1) Any Fuel Operator who fails or refuses to issue a fiscal invoice or fiscal receipt for any fuel transaction as required under

these regulations shall be guilty of a civil default and liable to a civil penalty.

(2) In the event of a default under subsection (1), the civil penalty shall provide for—

(a) the suspension of the operation of the civil penalty order for a period of fortyeight hours from the date of its service to enable the alleged defaulting Fuel Operator to show cause to the designated officer why the civil penalty order should not have been issued:

Provided that—

(i) if no such cause is shown within that period, the civil order shall be deemed to have been validly issued with effect from the beginning of such period;

(ii) if within that period it is shown that the civil order was issued in error, the designated officer shall withdraw the order and make the appropriate notation of withdrawal in the civil penalty register;

(b) a fixed penalty of one thousand United States dollars or its equivalent in local currency on the day of raising the penalty assessment on the date of service of the order; and

(c) the suspension of the penalty imposed under paragraph (b), conditionally upon the defaulting Fuel Operator taking the appropriate remedial action, namely, installing the Fuel Fiscal Device for the recording of all transactions subject to tax under this Act, no later than ninetysix hours after the civil penalty order is served on the defaulting Fuel Operator.

Failure to close fiscal day

23. (1) Any Fuel Operator who fails to close a fiscal day at the expiration of the required maximum fiscal day length configured on the fuel fiscal device shall be guilty of an offence, and liable to a civil penalty of twenty-five United States dollars or equivalent in local currency on the day of raising the penalty assessment, per each fuel

fiscal device per day that has a fiscal day that remains unclosed, up to a maximum period of ninety days.

(2) If the Fuel Operator continues to be in default after the period specified in subsection (1), it shall be guilty of an offence and liable to a fine not exceeding level 7 or to imprisonment for a period not exceeding twelve months or to both such fine and such imprisonment.

Offences where no specific penalty is provided

24. Any Fuel Operator who commits an offence under these regulations for which no specific penalty is provided shall be guilty of an offence and liable to a fine not exceeding level 7 or imprisonment for a period not exceeding three months or both such fine and such imprisonment.

PART VII

General Provisions

Powers of the Commissioner or any officer authorised by Commissioner

25. Notwithstanding any provision in any enactment or these regulations, the Commissioner or any officer authorised by the Commissioner shall, for the purposes of enforcing these regulations, have the following additional powers—

(a) to conduct or perform searches at a Fuel Operator's business premises;

(b) to seize, confiscate, and detain goods in respect of which an offence under these regulations has been committed;

(c) to dispose of or destroy goods seized, confiscated, or detained under paragraph (b) in the manner provided for in the Act or in any regulations made thereunder;

(d) to visit any Fuel Operator and inspect points of sale, business records, Fuel Fiscal Devices, computer systems, and any other devices used by Fuel Operators to record fuel transactions, at any time and with or without prior notice or permission;

(e) to monitor and conduct surveillance on Fuel Operators' systems, premises, and invoicing or receipting platforms and patterns; and

(f) to place locks, barriers, or other restrictions on the premises of noncompliant Fuel Operators for non-compliant with Fuel Fiscal Devices, with or without prior notice.

Revocation of licence or certification of Approved Supplier and or Approved Developer

26. (1) The Commissioner may revoke or terminate the licence or certification of an Approved Supplier or Approved Developer of Fuel Fiscal Devices where that Approved Supplier or Approved Developer—

(a) fails to comply with the provisions of sections 5 and 6; or

(b) breaches any condition or term of the licence or certification; or

(c) breaches any contract, service-level agreement, or memorandum of agreement entered with the Commissioner or Fuel Operator; or

(d) fails to comply with the provisions of any legislations related to tax administration in Zimbabwe, including Value Added Tax Act [*Chapter 23:12*], Customs and Excise Act [*Chapter 23:02*], or any criminal codification or laws in Zimbabwe; or

(e) engages in any of the following acts—

(i) acquiring Fuel Fiscal Devices from unlicensed Developers;

(ii) selling Fuel Fiscal Devices that are not approved by the Commissioner;

(iii) tampering with Fuel Fiscal Device configurations or engaging in fraudulent activities relating to the sale or operation of Fuel Fiscal Devices;

(iv) providing false or misleading information regarding the capabilities or status of Fuel Fiscal Devices.

(2) The revocation or termination of a licence or certification under subsection (1) shall be without prejudice to any civil or criminal liability arising under these regulations or any other enactment.

Obligation to demand and retain Fiscal Receipts or Fiscal Invoices

27. (1) Every purchaser may demand and retain a fiscal receipt or fiscal invoice immediately upon making a purchase from a Fuel Operator and keep such receipt or invoice in their possession.

(2) Upon request by the Commissioner or any officer authorised by the Commissioner, any person who has made a purchase shall produce the fiscal receipt or fiscal invoice as proof of purchase of the goods from the Fuel Operator.

(3) Any person who demands a fiscal receipt or invoice and is denied the same by a Fuel Operator shall immediately report the incident to the Commissioner through the quickest means of communication available to them.

Transitional provisions

28. The Commissioner may, by public notice, extend compliance timelines where system readiness or supply constraints warrant.

FIRST SCHEDULE (*Sections 2, 5 and 10*)

TECHNICAL SPECIFICATIONS OF FUEL FISCAL DEVICES

PART I

GENERAL TECHNICAL REQUIREMENTS

1. Every Fuel Fiscal Device shall comply with the following general technical requirements—

(a) be compatible with the Zimbabwe Revenue Authority's Fiscalisation Data Management System in accordance with the Fiscal Device API Gateway Requirements Specifications;

(b) comply with all applicable national, legal and licensing requirements and standards governing the fuel sales industry or sector, including fiscalisation legislation;

(c) possess interface capabilities enabling realtime data transmission to the FDMS;

(d) be capable of operating in both online and offline modes, queuing data and transmitting to FDMS once connectivity is restored;

(e) provide report functionality, including the ability to generate summarised and detailed ZReports for any given period, including the ability to open and close a fiscal day;

(f) provide data encryption, security, and protection mechanisms that are tamperproof, preserving the integrity of data and ensuring the quality of information recorded;

(g) be compatible with various software, systems, and devices used in the Fuel sales industry;

(h) be adaptable to technological changes, including the capability to be updated or upgraded remotely via internet connection or other approved methods; and

(i) be accessible by the Zimbabwe Revenue Authority and other regulatory bodies for inspection and oversight purposes.

PART II

Technical and Performance Specifications of Fuel Fiscal Devices

2. Every Fuel Fiscal Device shall—

(a) include a module with a memory, and, in the case of a network system, such memory shall—

(i) not be accessible to any Fuel Operator or other unauthorised person; and

(ii) be protected by tamper-evident physical safeguards (for hardware devices) and cryptographic integrity controls (for virtual devices), such that any unauthorized access or modification is recorded and detectable;

(b) enable—

(i) the counting in memory of data for the reports referred to in the Second Schedule;

(ii) the closing and rolling forward of reporting counters at the end of each reporting period, without deleting, resetting or altering fiscal memory;

(iii) the application of tax rates and settings received from the FDMS or otherwise authorised by the Commissioner, with audit logging of all changes; and

(iv) the counting of credit notes and debit notes issued by the device as referred to in the Second Schedule;

(c) incorporate a safety mechanism, application, or configuration that is equipped with non-volatile, tamper proof and non-erasable fiscal memory;

(d) be capable of recording, monitoring and transmitting in real time—

(i) ambient temperature;

(ii) fuel density;

(iii) price and currency used on dispensation;

(iv) quantity;

(v) date and time;

(vi) address and location of transaction;

(vii) Taxpayer Identification Number (TIN);

(viii) description of fuel sold;

(e) be capable of recording fuel quantity on dispensing, fuel quantity level measured in storage facility and additions or withdrawals in the Fuel Operator storage facility;

(f) be capable of recording in its memory—

(i) the date and time of commencing and ceasing operations;

(ii) the tax rates assigned to the description of goods and services;

(iii) the serial numbers and dates for the resetting of reports every twenty-four hours; and

(iv) the numbers and dates of the resetting of register memory, including information on the initiation of resetting and the method of performance;

(v) storing recorded data in such a manner as to be incomprehensible to any unauthorised person;

(vi) protecting itself against alteration or erasure of data;

(vii) printing daily, monthly, and annual reports as provided in the Second Schedule;

(viii) printing sales records for standard time units (day, month, year);

(ix) printing data recorded in memory by commands entered through the device keyboard;

(x) recording and storing data in a backup master audit facility;

(xi) automatically recovering data within ten minutes of any power interruption;

(xii) recording in memory the dates of all transactions;

(xiii) interfacing with the FDMS and receiving commands therefrom;

(xiv) recording transactions in multicurrency;

(xv) receiving and executing instructions from the server, including the transmission of a registration message upon activation, which shall contain at least the serial number, date and time of activation, and licence number of the device; and

(xvi) keeping records of invoices, credit notes, and debit notes issued by the device.

3. Technical requirements for Fuel Fiscal Device shall be as follows:

(a) must open a new fiscal day before issuing receipts and invoices;

(b) if internet connection is available, must retrieve configuration from FDMS (getConfig endpoint) before opening a new fiscal day;

(c) must save data from get Config response about taxpayer and/or its branch (taxpayer name, address, contacts, etc.) and use it for receipt and invoice printing;

(d) must track the time passed from opening a fiscal day, that it would not exceed maximum allowed fiscal day length (specified in parameter tax Payer Day Max Hours;

(e) notification of fiscal day end must be shown to the user a few hours before maximum fiscal day length is reached. The exact number of hours left to maximum fiscal day length is specified in parameter taxpayer Day End Notification Hours;

(f) allocate each fiscal receipt or fiscal invoice a globally unique sequential number that continues across fiscal days and record it in the electronic journal and transmitted dataset;

(g) allocate a fiscal-day counter that resets at the start of each fiscal day, in addition to the global unique number;

(h) fiscal day opening message must be sent immediately after opening a fiscal day, however if there is no connection, it can be delayed;

(i) receipt must be sent to Fuel Fiscal Device Gateway API only after successfully opening a fiscal day;

(j) must send receipt to Fuel Fiscal Device Gateway API only after the finalisation of a transaction;

(k) must send fiscal receipt or fiscal invoice to Fuel Fiscal Device Gateway API one by one in ascending receipt Global No order, not skipping any of fiscal receipt or fiscal invoice. In case submission of fiscal receipt or fiscal invoice failed, issue must be fixed, and fiscal receipt or fiscal invoice submission must be repeated;

(l) must send receipt to Fuel Fiscal Device Gateway API immediately after finishing it in case there is an internet connection and there are no waiting receipts to be sent, otherwise receipt must be put to the queue on device and send later when connection will be restored;

(m) must update counters after issuing a receipt and reset counters after starting a new fiscal day;

(n) must renew certificate nearing expiry before its expiration date;

(o) offline Fuel Fiscal Device must send file content only for a single closed fiscal day. File cannot contain invoices from more than one fiscal day;

(p) if file is bigger than three megabytes, content should be split into separate files, footer cannot be split to two or more separate parts;

(q) if fiscal day has a lot of fiscal receipts or fiscal invoices, it is recommended to split the fiscal receipts or fiscal invoices and Z report to separate files;

(r) if offline Fuel Fiscal Device prepared more than one file for a single fiscal day, these files must be sent to FDMS one by one in sequential order;

(s) offline Fuel Fiscal Devices must be able to export file with invoices if user requests it for manual upload to FDMS;

(t) user must not uninstall application from device if there are unsent invoices.

Fiscal Memory Capabilities

4. Every Fuel Fiscal Device shall have the following fiscal memory capabilities which should record the following data—

(a) data which is compatible with the FDMS Fiscal Device API Gateway specification requirements;

(b) the date and time of commencing and ceasing the daily operations;

(c) the Fuel Fiscal Device's license number and the Fuel Operator's Taxpayer Identification Number (TIN), or deregistration without disturbing the contents of the fiscal memory;

(d) the tax rates assigned to the description of goods and services if any;

(e) the value of the sales without the tax, the value of sales exempted from tax divided into categories of individual tax rates, total amount of the tax and the total amount of sales including tax, specifically the currency applicable;

(f) the serial numbers and the dates for the resetting of the report every twenty-four hours;

(g) the numbers and dates of the resetting of the register memory and the information on the initiation of resetting and the methods of its performance;

(h) all amendments, corrections and cancellations;

(i) a minimum of 2,400 daily Z sales reports;

(j) reconnection reports each time the fiscal memory is disconnected;

(k) the recorded data in the memory and record that data in the control paper roll.

Printing capabilities

5. Every Fuel Fiscal Device shall have the following printing capabilities—

(a) be able to issue (and print if required) fiscal documents as defined in the regulations with the following features:

(i) date and time of transaction;

(ii) details of the Fuel Operator: TIN, name, address, contact details;

(iii) details of purchaser (optional);

(iv) product;

(v) quantity;

(vi) currency;

(vii) unit price;

(viii) total sale amount;

(ix) fuel pump identification;

(x) nozzle and fuel selling point identification;

(xi) mode of payment (cash, card, mobile money or any other accepted mode).

(b) ability to print the daily, monthly and annual reports;

(c) print the sales records from its memory as per standard time units (day, month, year);

(d) manual or automatic self-generation of daily Z reports at the end of the fiscal day;

(e) print data recorded in the memory and by commands given through the keyboard;

(f) inserting the unique license number of the Fuel Fiscal Device on each issued fiscal receipt;

(g) produce print outs that last not less than six years;

(h) reprint a Fiscal Receipt or Fiscal Invoice or any other document in case of disconnection or paper jam;

(i) easily replaceable paper rolls;

(j) be equipped with sharp paper cutters;

(k) use English language;

(l) generate Verifiable Fiscal Signature in the form of Authentication Code and QR Codes.

Security and reliability

6. Every Fuel Fiscal Device shall have the following security and reliability features–

(a) be compatible with the FDMS Fiscal Device API Gateway specification requirements;

(b) have unique password with minimum of six digits that will be used by Fuel Operators and facility to change password;

(c) be registered on protected memory and not modified;

(d) be kept free from computer virus attack;

(e) have internal authentic data management;

(f) have intrinsic protection against unauthorised actions;

(g) have application upgrades that run independently without confronting security functions;

(h) be capable of automatic saving of configured data and records on permanent memory;

(i) be capable of automatic handling of electronic journal memory of all sorts;

(j) have internal rechargeable batteries as well as power supplies;

(k) be capable of printing Z sales report before any configuration change;

(l) should not allow update of stored data or reverse of transactions; and

(m) have a unique serial number from the Developer allocated per country that can only be used in this case in Zimbabwe.

Connectivity

7. Every Fuel Fiscal Device shall have the following connectivity abilities—

(a) be compatible with the FDMS Fiscal Device API Gateway specification requirements;

(b) support one or more secure connectivity methods (including cellular, Wi-Fi, and Ethernet where applicable) and transmit data using encryption and authentication mechanisms approved in the Technical Standard;

(c) allow all Z report data to be transmitted to and confirmation received from the system before the data is saved to the electronic fiscal memory in the Fuel Fiscal Device;

(d) allow status queries to be made and be able to transmit requested information on transaction and statistics upon request immediately. A detailed exhaustive description of the protocol must be provided and secured with unique encrypted codes.

Fuel Fiscal Devices Compliance

8. Every Fuel Fiscal Device shall have the following device compliance factors–

(a) be approved by international recognised bodies, and evidence must be provided to the Commissioner for the accreditation of such bodies prior to approving the use of the specific Fuel Fiscal Devices in Zimbabwe;

(b) certified as relevant device for performance of work intended. A certificate with full annexes of all tests performed on the Fuel Fiscal Device and results thereon must be submitted to the Commissioner for approval;

(c) supplied with its manual, software, accessories and all necessary documentations.

PART III

SPECIFICATIONS OF FISCALISATION DATA MANAGEMENT SYSTEM

9. The Fiscalisation Data Management System (FDMS) shall be the central system used for the receipt of all transactions, including ZReports, from every Fuel Fiscal Device and for the generation of repor0ts required to comply with these regulations.

10. The FDMS shall, at a minimum, provide the following functionalities—

(a) Self-service Platforms

Provide dedicated selfservice portals for:

(i) approved Developers;

(ii) approved Suppliers;

(iii) fuel Operators; and

(iv) use by the Commissioner and officers.

(b) device Interface to provide seamless, secure, and realtime interfacing with Fuel Fiscal Devices;

(c) operations Management to enable the Commissioner to manage and control operations relating to Fuel Operators, Fuel Fiscal Devices, Approved Suppliers, and Approved Developers;

(d) system Integration to enable interface with other systems in use by the Commissioner and such external systems as the Commissioner may require;

(e) security to provide adequate data encryption, authentication, and accesscontrol mechanisms for the management of Fuel Operators and protection of data;

(f) invoice Processing to validate and verify fiscal invoices received from Fuel Fiscal Devices;

(g) reporting to generate such internal and external reports as may be required by the Commissioner;

(h) administrative functions to operate in a manner necessary for the Commissioner to enforce and administer tax compliance under the Act and these Regulations;

(i) data storage to store all data received from interfaced Fuel Fiscal Devices in a secure database for use by the Commissioner;

(j) system updates to provide for updates, upgrades, and enhancements as may be required by the Commissioner; and

(k) to generate verifiable fiscal signatures including authentication codes and Quick Response (QR) codes, for fiscal documents.

Second Schedule (*Section 5*)

Procurement, Approval and Licensing of Suppliers and or Developers of Fiscal Devices for the Fuel Sector

1. For the purposes of approving, certification and licensing of suppliers and developers of Fuel Fiscal Devices under these regulations, the Commissioner may

call for potential suppliers of Fuel Fiscal Devices to express their interest and/or make application to be approved and licensed to supply Fuel Fiscal Device to Fuel Operators through a procurement process in line with the requirements of the Public Procurement and Disposal of Public Assets Act [*Chapter 22:23*]. In responding to the call for expression of interest and or notice by the Commissioner, the applicants should furnish the Commissioner with information which includes—

(a) detailed specification of the Fuel Fiscal Devices the applicant plans to introduce in the market, in compliance with the specification described in these regulations.

(b) proof or concept satisfying requirements to prototypes and demonstrations of ability to develop Application Programming Interface (APIs) and specifications which comply with the Commissioner's Backend System on prototype devices or systems;

(c) name of the applicant and brief history of their business and experience in dealing with the Fuel Fiscal Devices;

(d) detailed training programme for the operation and programming of the Fuel Fiscal Devices, the length of time required for this training, the training fees if any;

(e) the technical, maintenance and repair service that the applicant will provide and the replacement parts to be kept in their inventory;

(f) the amount of finance the applicant plans to allocate to the project;

(g) expensed selling price for the Fuel Fiscal Devices;

(h) the guarantee the applicant will provide for the Fiscal Fuel Devices in case of malfunction;

(i) applicant's proof of tax registration and compliance and bankers and banking details;

(j) list of qualified technical staff capable for performing periodic maintenance and details of their professional qualifications;

(k) any other relevant information the applicants may wish to bring to the Commissioner's attention; and

(l) the following documents—

(i) operation and maintenance catalogue;

(ii) photograph block diagram;

(iii) component lists;

(iv) proposed contracts and Service Level Agreements between the applicant and Approved Developers.

2. The Commissioner reserves the right to—

(a) select, accept, and or reject any applicant for approval or licensing for being an approved supplier or developer of Fuel Fiscal Devices;

(b) reverse any call for expression of interest or notice published on procurement or approval of suppliers of Fuel Fiscal Devices under these regulations.

THIRD SCHEDULE (*Sections 9 and 10*)

REQUIRED RECORDS AND INFORMATION TO BE GENERATED BY FUEL FISCAL DEVICE

PART I

Fiscal invoice and fiscal receipt

1. (1) A fiscal invoice or fiscal receipt generated by Fuel Fiscal Device shall contain the following particulars, and where the purchaser provides a Taxpayer Identification Number it shall be recorded and printed:

(a) the words "START OF" at the top and "END OF" at the bottom;

(b) the name and address of the Fuel Operator of the registered device;

(c) Taxpayer Identification Number of the Fuel Operator of the registered device;

(d) name and address of the purchaser;

(e) Tax Identification Number of the purchaser, where provided;

(f) the identification number of the Fuel Fiscal Device;

(g) the name, quantity, currency, unit price and item description of the product or service;

(h) discounts, mark ups, changes, corrections;

(i) the date and time of issue of the receipt;

(j) the total amount payable;

(k) daily ascending serial number for the receipts; and

(l) Verifiable Fiscal Signature in the form of Authentication Code and QR Code generated from FDMS.

(2) Where a fiscal invoice satisfies all of the above features except buyer details, shall be referred to as the fiscal receipt.

Daily report

2. (1) The Fuel Fiscal Device shall generate Z daily transaction report, even where no daily transaction has taken place and the daily running totals in the working memory give zero. The information printed on the Z report shall be contained between the phrase 'START OF FISCAL REPORT' and 'END OF FISCAL REPORT'.

(2) The information to be contained in a daily Report (Z Daily transaction record) from Fuel Fiscal Device shall be as follows—

(i) name or trading name and address of the Fuel Operator;

(ii) goods or services to which the invoice relates;

(iii) Tax Identification Number of the purchaser;

(iv) tax offices which assess the taxpayer/ of the approved Fuel Fiscal Device;

(v) heading Z daily transaction report;

(vi) the serial number of the Z daily transaction report;

(vii) the identification number of the approved Fuel Fiscal Device, where there is more than one approved Fuel Fiscal Device in the same Fuel Operator's out let;

(viii) the time and date the Z daily transaction report was generated;

(ix) the daily running and cumulative totals, such as total gross sales and any reports from the data memory since the previous (last) Z daily transaction report was generated stating the number of revenue receipts generated for the day, discounts, mark ups, changes, corrections, number of working memory errors, name changes (in details stating the former and current name), number of printer disconnections and number of interventions by authorised engineer or technician;

(x) the reports from the data memory from when the approved Fuel Fiscal Device was registered including the current daily transaction, stating total gross sales the Fuel Fiscal Device was commissioned, number of revenue receipts generated, total number of working memory errors, total number of name changes, total number of spontaneous printer disconnections, number of interventions by authorised engineer or technician;

(xi) the license number of the approved Fuel Fiscal Device.

Monthly report

2. (1) The approved Fuel Fiscal Device must be capable of reading and printing the content of the data memory at all times by selecting any calendar period it starts and ends or by selecting two different Z daily transaction record numbers (the first and the last).

(2) The information to be found in a monthly report should include—

(a) name or trading name and address of the Fuel Operator;

(b) goods or services procured;

(c) Taxpayer Identification Number;

(d) tax offices which assess the taxpayer of the approved Fuel Fiscal Device;

(e) heading "Z" Monthly report;

(f) the registration or identification number of the approved Fuel Fiscal Device, where there are more than one Fuel Fiscal Device in the same out let;

(g) the time and date the 'Z' daily transaction report was generated;

(h) The approved Fuel Fiscal Device tax data memory reports for the period in question, stating—

(i) total gross sales distinguishing between zero-rated, standard rated and exempt supplies;

(ii) total number of working memory errors;

(iii) total number of name changes;

(iv) total number of spontaneous printer disconnections;

(v) total number of interventions by authorized engineer or technician;

PART II

OPERATIONAL REPORTS

The following reports shall be generated by the FDMS database:

1. Daily gross sales report which shall contain the following information:

(i) serial number of the transaction;

(ii) location of the Fuel Operator;

(iii) license number of the Fuel Fiscal Device;

(iv) taxpayer identification number (TIN) of the customer;

(v) receipt or invoice number;

(vi) goods sold including the quantity, currency, unit price and total value;

(vii) date of the transaction;

(viii) discounts (if any);

(ix) credit notes (if any);

(x) debit notes (if any);

(xi) net value;

(xii) total sales and cumulative totals;

(xiii) ambient temperature; and

(xiv) fuel density.

2. Weekly gross sales.

The weekly gross sales shall contain all the daily sales (Z daily transaction records) achieved for the week.

3. Monthly gross sales

Monthly gross sales shall contain daily gross sales (Z daily transaction records) with weekly sub totals.

4. Annual gross sales

The annual gross sales shall contain daily gross sales (Z daily transaction records) with monthly sub totals.

5. Number of Fuel Fiscal Device Interruptions—

(a) the Fuel Fiscal Device interruption report shall contain the following information:

(i) serial numbers of Electronic Fiscal Device interruptions;

(ii) number of interruptions;

(iii) commissioner's registration number of the Fuel Fiscal Device intervened;

(iv) serial number of the machine disconnected;

(v) number of disconnections;

(vi) number of electronic journal replacement;

(vii) date and time;

(viii) type of errors and number of errors;

(ix) fiscal Invoice or Fiscal Receipt in which errors occurred;

(b) the report should be able to distinguish between disconnections, errors, change of name and interventions to the device and shall be in a format prescribed by the Commissioner from time to time.
