IT is hereby notified that the Minister of Energy and Power Development, after consultation with the Authority, in terms of section 65 of the Electricity Act [*Chapter 13:19*], has made the following regulations:—

Title

1. These regulations may be cited as the Electricity (Minimum Energy Performance Standards for Appliances and Labelling) Regulations, 2026.

Interpretation

2. In these regulations—

"appliance" means a device, machine or piece of equipment that uses electricity to perform a specific function;

"label" means a label of an appliance which contains product information, including energy performance;

"accredited testing facility" means a laboratory that has been formally recognised by the Authority as technically competent to perform specific tests, measurements, or calibrations.

Application

3. These regulations shall apply to importers, manufacturers, distributors, and retailers that supply appliances.

Registration of manufacturers and importers of appliances

4. (1) Every manufacturer or importer of appliances listed in the First Schedule shall register with the Authority.

(2) The Authority shall keep a register containing all information that indicates—

(a) appliances that are compliant with the applicable minimum electricity performance standards (MEPS) and all related certificates of conformity; and

(b) details of the manufacturer or importer.

(3) The registration shall be in a form specified in the Second Schedule.

(4) Any person who contravenes subsection (1) shall be guilty of an offence and liable to a five not exceeding level 5 or to imprisonment for a period not exceeding six months or both such fine and such imprisonment.

Prohibition of inefficient appliances

5. (1) No person shall import, manufacture, store, offer for sale, sell, distribute, or receive as a donation an appliance listed in the First Schedule unless it complies with the MEPS requirements provided for each appliance.

(2) The standards and requirements referred to in subsection (1) shall be as follows—

(a) Zimbabwe Standards (ZWS) 1033:2017 - Energy Efficiency of Electrical and Electronic Apparatus;

(b) ZWS 1007:2016 - Performance of range tops;

(c) ZWS 1008:2016 - Induction cooktops, countertop, drop-in mounted or floor standing;

(d) Air Conditioning, Heating, and Refrigeration Institute (AHRI) Testing and Rating Standard 210/240-2017 - Performance Rating of Unitary Air-Conditioning & Air-Source Heat Pump Equipment; and

(e) International Electrotechnical Commission (IEC) 60879:1986 - Performance and construction of electric circulating fans and regulators.

(3) Any person who contravenes subsection (1) shall be guilty of an offence and liable to a fine not exceeding level 5 or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

Labelling requirements and information

6. (1) No person shall import, manufacture, store, offer for sale, sell, distribute, or receive as a donation an appliance unless the appliance bears a label which indicates the minimum energy performance.

(2) The label on an appliance shall—

(a) be in the form specified in the Third Schedule; and

(b) be written in the English language; and

(c) be affixed conspicuously on both the appliance and the package that contains the appliance.

(3) Where the label is affixed on the appliance, it shall be in colour, printed on a waterproof material and affixed conspicuously onto the appliance so that it remains clearly visible and is not obscured whenever the appliance is displayed.

(4) Any supplier, manufacturer or importer of an electrical appliance—

(a) without a label specified in the Third Schedule; or

(b) who fails to display a label;

shall be guilty of an offence and liable to a fine not exceeding level 5 or to imprisonment for a period not exceeding six months or both such fine and such imprisonment.

(5) Subject to subsection (4)(a) and (b), a supplier, manufacturer or importer shall provide an energy performance certificate from an accredited testing centre and rectify the labelling requirements within thirty days.

Energy performance conformity certification

7. (1) The manufacturer of appliances listed in the First Schedule shall ensure that energy performance conformity certification has been conducted by an accredited testing facility, and such a certificate shall be made available to the Authority.

(2) No person shall import an electrical appliance without a consignment-based conformity assessment certificate from an assessment agent, as defined in the Statutory Instrument 132 of 2015, Control of Goods (Open General Import Licence) (Standards Assessment) Notice, 2015, indicating the minimum energy performance standards specified in the First Schedule.

(3) Where an appliance is not provided for in terms of subsection (2), certification from the country of origin shall be acceptable if it has been issued by an accredited testing facility.

(4) Any person who contravenes subsections (1), (2) and (3) shall be guilty of an offence and liable to a fine not exceeding level 5

or to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

(5) The manufacturer or importer in question shall rectify the non-conformity, and failure to comply with this requirement shall result in the Authority—

(a) seizing the appliance; and

(b) disposing of the appliance in a manner specified in section 8, and the cost of destruction shall be borne by the manufacturer or importer in question.

Disposal of seized appliances

8. Disposal of seized appliances shall be as set out in the Environmental Management Hazardous Waste Regulations, 2007, published in Statutory Instrument 10 of 2007.

Transitional

9. Any importer or manufacturer, distributor, or retailer who imported, manufactured, or distributed any products that do not comply with the standards specified in section 4 before the promulgation of these regulations may be exempted from the prohibition specified in section 5:

Provided that—

(a) the period concerned may vary from six months to one year (depending on the cost of the products or technologies used); or

(b) the importer, manufacturer, distributor, or retailer shows on a balance of probabilities to the Authority that their importation, manufacturing or distribution of the products predated the regulations

FIRST SCHEDULE (*Sections 4(1), 5(1), 7(1), (2)*)

APPLIANCES LISTING

No	Appliance(s)	Applicable Standards
1.	Household refrigerator	SAZ/IEC 62552:2007 - Household refrigerating appliances - Characteristics and test methods - Part 1: General requirements

No	Appliance(s)	Applicable Standards
2.	Television (Plasma, LCD or CRT)	1. IEC 62087-1:2008: Audio, video and related equipment–determination of power consumption–Part 1: General. 2. IEC 62087-3:2008: Audio, video and related equipment–determination of power consumption–Part 3: Television sets 3. IEC 62301:2006 - Household electrical appliances–Measurement of standby power
3.	Air conditioner	1. SANS 54511-3_2016: Air conditioners, liquid chilling packages and heat pumps with electrically driven compressors for space heating and cooling Part 3: Test methods. 2. AHRI Testing and Rating Standard 210/240-2017, Performance Rating of Unitary Air-Conditioning and Air-Source Heat Pump Equipment. 3. SAZ/IEC:62552
4.	Induction cook stove	ZWS 1008:2016
5.	Domestic fan (wall, desk, pedestal or ceiling)	IEC60879:1986-Performance and construction of electric circulating fans and regulators
6.	Electric blankets	IEC 60299
7.	Irons and ironing machines	IEC 60311
8.	Electric cooking appliances and food preparation appliances such as ovens, steam ovens, grills, hobs, toasters, fryers, coffee makers, etc.	IEC 60350 series
9.	Electric storage water-heaters	IEC 60379
10.	Dishwashers	IEC 60436
11.	Clothes washing machines, washer-dryers, tumble dryers	IEC 60456
12.	Electric warming plates, kettles, jugs	IEC 60496
13.	Ventilators, fans	IEC 60665
14.	Room heaters	IEC 60675
15.	Microwave ovens	IEC 60705
16.	Electric shavers	IEC 61254

No	Appliance(s)	Applicable Standards
17.	Electric cooking appliances and food preparation appliances such as ovens, steam ovens, grills, hobs, toasters, fryers, coffee makers, etc.	IEC 61817
18.	Electrical hair care appliances	IEC 61855
19.	Information technology equipment, desktop and notebook computers	IEC 62018
20.	Audio, video, and related equipment	IEC 62087 series
21.	Standby power consumption of household appliances	IEC 62301
22.	Clothes washing machines, washer-dryers, tumble dryers	IEC 62512
23.	Refrigerators, freezers and other similar appliances	IEC 62552 series
24.	Information technology equipment, desktop and notebook computers	IEC 62623
25.	Household robots	IEC 62849
26.	Vacuum cleaners and cleaning appliances	IEC 62885 series
27.	Household robots	IEC 62929

SECOND SCHEDULE (*Section 4(3)*)

REGISTRATION APPLICATION FORM

PART A

Application for registration as a Manufacturer or Importer

Date: _____

Manufacturer: _____ Importer: _____

1. Company Name: _____
2. Contact details
   (a) Physical Address: _____
   (b) Telephone No.: _____
   (c) Cell Phone No._____

(d) Email Address: _____

(e) Website (if any): _____

3. Company registration documents
   (a) Certification of incorporation
   (b) Other company registration documents
   (c) Tax clearance
4. Details for products range

#	Product

PART B

Product Registration Form

Date: _____

1. Company Name: _____
2. Manufacturer/Importer Registration Number: _____
3. Product details

#	Product	Model	Code

4. Provide copies of the following for each product line
   (a) Certificate of conformity.

Test reports

THIRD SCHEDULE (*section 6(2), (4)(a)*)

LABELLING REQUIREMENTS

PART A

Energy Efficiency Label

The label shall be based on—

(a) a star-based system, with at least 5 stars, where more marked stars mean greater efficiency and less marked stars mean lesser efficiency: or

(b) a letter-based scale A-G, with A being the most efficient and G being the least efficient. The scale from A to G shall be colour-coded green to red with an indicator showing the appropriate rating.

PART B

Product label information

The label presents the following—

(a) name of the manufacturer;
(b) brand name;
(c) the model and model number;
(d) Voltage rating;
(e) Current rating;
(f) the average energy consumption per year;
(g) the average water consumption, where applicable;
(h) power factor;
(i) noise level;
(j) other relevant product information applicable to the specific appliance; and
(k) the number of the applicable standard.
